Project Abstract

The City of North Port, Florida is requesting \$150,000 from the fiscal year 2019 Gulf States Regional Law Enforcement Technology Assistance Initiative to purchase camera license plate reader systems that will be instrumental for gathering and sharing data and intelligence. This grant opportunity is instrumental to the development of an information exchange program that can, and will, benefit gulf states.

The City of North Port is a bedroom community and one of the fastest growing cities in the State of Florida. The city is one of the largest land-mass cities in Florida at approximately 104 square miles, and the most populated city within Sarasota and Manatee Counties. Some of the highlights that exemplify the rapid growth within North Port is the newly constructed Atlanta Braves Spring Training Complex, the building of numerous chain-restaurants, development of new hotels, and development of an entertainment district. Approximately 15 miles of Interstate 75 and approximately 9 miles of U.S. 41 cut through North Port. These thoroughways are major arteries for anyone traveling north and south between all major cities on the coast of Florida including Tampa, Fort Myers, Naples, and Miami.

The City of North Port alone has been subject to arsons, robberies, homicides, kidnapping, thefts, and burglaries that have started, ended, or intersected with other law enforcement jurisdictions. This project will provide the equipment needed to assist officers to locate, and apprehend subjects involved in these felonious acts quickly and safely. Furthermore, organized crime has deployed the tactic of traveling on major arteries, such as Interstate 75 or State Route 41, from other jurisdictions into the City of North Port to commit these heinous acts. These crimes also share trends within other jurisdictions that require seamless and immediate sharing of intelligence whenever they are occurring or about to occur. This project will strengthen the sharing of actionable intelligence immediately between officers and to other jurisdictions as the license plate reader system uses state-of-the-art technology to heighten surveillance and apprehension capabilities.
