REQUEST FOR LETTERS OF INTEREST NO. 2021-01

**CITY OF NORTH PORT WATER PIPELINE BRIDGE REPLACEMENTS – HABERLAND/WOODHAVEN/N. TOLEDO
BLADE/ORTIZ**

The City of North Port Utilities Department (NPU) is currently accepting letters of interest from all the firms within Contract No. 2020-58, Category 2 for Professional Engineering Services for NPU. This request for letter of interest for Professional Engineering Services under Contract No. 2020-58 Category 2, is being sent in advance of the City Commission's deliberations and approval of the contract(s) at its meeting on October 13, 2020. The referenced project is budgeted for fiscal year 2020/2021 and NPU anticipates that the City Commission will approve all the contracts and this project will move forward. However, NPU cannot guarantee approval. Should the City Commission not approve some or all the contracts on October 13, 2020, NPU may recall this request without any cost incurred.

INTENT: It is the intention of NPU to secure professional engineering services to design, permit, provide bidding assistance, and provide limited construction phase services associated with the replacement of the existing potable water mains affixed to the following bridges:

1. Haberland Boulevard– 8-inch existing ductile iron water main
2. Woodhaven Drive – 8-inch existing ductile iron water main
3. N. Toledo Blade Boulevard at Snover – 12-inch existing ductile iron water main
4. Ortiz Boulevard– 8-inch existing ductile iron water main and 2-inch existing water service

BACKGROUND/SCOPE OF SERVICES:

BACKGROUND

There are four bridge pipelines that North Port Utilities (NPU) has identified for replacement. Sarasota County is currently working on a design project on the bridge at Ortiz Boulevard. This Sarasota County project is funded for construction by Sarasota County in FY 2022. Sarasota County needs NPU to relocate the 8-inch water main and 2-inch service that are affixed to the bridge, prior to the letting of the County's construction project. The other three existing water mains affixed to the bridges are exhibiting points of failure, particularly at bends in the pipe. In replacing the pipelines, NPU seeks to replace the existing bridge mounted ductile iron pipes with upsized HDPE pipes, horizontal directional drilled underneath the waterways at each of the bridges, eliminating the pipe across the bridge.

Isolation of these water mains are not anticipated to directly impact customers. NPU will require assistance with the necessary permitting to include, but not limited to, FDEP, DOH, and any other regulatory permits as applicable.

SCOPE OF SERVICES

TASK 1- PROJECT MANAGEMENT AND COORDINATION

This task will include overall project management by the consultant and coordination with NPU, attendance at project meetings, and assistance with any permitting coordination as needed. This task will include a project kickoff meeting with NPU staff to review the project, regulatory concerns, and any items pertinent to the progress of the project.

Additional data may be requested as needed. The firm will work with NPU staff to acquire the information. This may include phone calls, meetings, site visits and email communications with staff.

TASK 2 – DESIGN AND PERMITTING

The firm shall review existing infrastructure, design and engineer the new HDPE HDD potable water mains underneath each waterway, as well as the disconnection and removal of the existing bridge mounted pipelines. The firm shall obtain survey and geotechnical information to develop design plans, Technical Specifications, Engineer's Opinion of Probable Construction Cost, and details for this project. The Technical Specifications will include NPU's Standard Technical Specifications to be supplemented by the engineer as necessary and conform to the City's procurement procedures and related front-end documents.

The firm will coordinate the necessary topographical survey work including the locations, sizes and configurations of the existing distribution piping and cross sections of the bottoms of all the waterways.

The firm will prepare all permit applications necessary to execute construction of the project. The firm will coordinate with NPU and applicable regulatory agencies on any requests for information and compliance requirements.

TASK 3 – BID PHASE SERVICES

The firm shall develop a detailed, line item, unit price all-inclusive bid form, non-standard contract documents, for use by NPU. The firm will attend a pre-bid meeting as necessary and assist the City in answering contractor questions via addenda during the bidding process. Upon receipt of bids, the firm will evaluate the bids including performing reference checks on the apparent low bidder and make an award recommendation to the City within five (5) working days of the bid opening.

TASK 4 – CONSTRUCTION PHASE SERVICES

The firm shall provide services during construction for submittal review and approval, response to requests for information from the contractor, and assist with any change orders as needed. The firm will use construction information provided by NPU, provide limited construction observation, and utilize as-built information provided by the contractor to finalize record drawings, complete construction certification forms and submit same to the regulatory agencies to certify the project for service. Services provided will also include participation in progress meetings with NPU staff and construction contractors as needed. The firm shall provide assistance as needed with project closeout items as may be required for regulatory permitting.

DELIVERABLES

The firm shall provide an electronic copy of their plans, Technical Specifications and details by 16 weeks after the kickoff meeting. The bid form shall be provided in Microsoft Excel and portable document (pdf) formats. Plans and record drawings will be provided in AutoCAD and pdf format. The Technical Specifications will be provided in pdf format. All other written material will be provided electronically in Microsoft Word and/or pdf formats. Once this contract is complete, the specifications, bid form and details will become property of NPU and the City of North Port.

The project milestones and deliverables to be provided for this project include the following:

- Kickoff meeting attendance, agenda and minutes

- Topographical survey
- Data request list
- Coordination of regulatory permitting
- Design of the water main replacement
- Review 60% and 90% plans and specifications with NPU
- Final plans signed and sealed by a professional engineer licensed in Florida, permits, Technical Specifications, bid form, and Engineer's Opinion of Probable Construction Cost sixteen (16) weeks after the project kick-off meeting
- Attendance at pre-bid meeting and progress meetings with the NPU as needed
- Assistance with bid review and recommendation of award
- Submittal review, responses to requests for information during construction, and change order assistance as needed
- After construction, certification of construction, signed and sealed record drawings, and project closeout

PROPOSAL REQUIREMENTS

Proposals shall include a project plan which specifies the firm's understanding of project and required deliverables; ability and relevant expertise/qualifications of the firm's personnel to be used in performing the service; availability of staff and ability to meet project schedule; the firm's proposed cost saving measures for the project, if any; and provide a schedule that will meet the timeline requirements of this project.

Engineers are to provide references for at least three (3) similar projects within the last five (5) years. Name, title, email and phone numbers are required for appropriate contact for each reference.

Proposals are to include the names of all subcontractors to be used on this project.

ATTACHMENTS
