

Dear city of North Port commissioner(s)
At my school I see kids or friends that vape,
teachers and parents are concerned and so am I,
I don't wanna see or smell vape anywhere.
I choose to not smoke or vape
living my healthy life and lungs open.

Renick Garcia, 13 years old

Vaping and using e-cigarettes is a big problem for youth like me especially in schools. At my school I see a lot of kids who are vaping and using these products during school hours. Most of the kids who don't vape breathe in second-hand vape smoke in the bathroom when we need to use them and the rules against kids buying them and using them. It is happening. I don't want to see or smell vape anywhere, especially at school. Living a healthy life and keeping my lungs open.

Sincerely, Jomarc, age 15

Vaping and using E-cigarettes is a big problem for kids around me. Kids around my age especially use E-cigarettes mostly around school hours. The kids that don't vape breathe in second hand smoke and it is harming us. During school hours there are usually 10 girls in the bathroom and they are vaping and it's so awkward when I'm trying to use the restroom. Most people think that these E-cigs and vapes are getting out of hand. I chose to be smoke free and vape free, living a healthy life and keeping my lungs open, please consider helping us fight vaping and keeping it out of the reach of youth like me.

Sincerely,
Illyria age 14

Dear City or North Port
Commissioner(s),

vaping and e-cigarettes has made a huge impact in our everyday lives. At my school, when I'm walking down the halls I see or know people who use the E-Cigs or vapes. Most of the time kids who vape in the halls or bathroom can smell it. And me who doesn't do it gives me a really bad migraine. Even though kids that are under age shouldn't be buying these products they still tend to buy the products. Teachers and parents are concerned/worried, and so am I. I would really be happy if I don't have to see and smell the smoke anywhere, or at school! I promise to be smoke/vape free, living happy and healthy life and keep my lungs strong and healthy. PLEASE CONSIDER HELPING US FIGHT VAPING AND KEEPING OUT OF THE REACH OF YOUTH LIKE ME!

Sincerely,
Kailey, 14

Dear City of North East Commission,

Vaping and doing e-cigarettes is a big problem for your body. At my school or middle school, I see and know people who vape after school or in the bathroom. People who vape or smoke next to people who don't vape or smoke it is called second hand vape smoke. Even though the law states that 18 or under are not allowed to buy these kind of things but it still happens. Kids don't tell their parents they are doing these things. I don't want to smell smoke that smells bad because it hurts my throat but people who make vape juice they make them smell good so kids or preteens like them. I choose to not vape or drink alcohol and bad drugs because I don't want to go through the pain after having a good time. I will help fight vaping and keep living.

p.s. Sorry "commiss" spelled.

Sincerely, Amber Dodge, age 15

Vaping and using e-cigarettes is a big problem for young people and even older people. Especially in schools is where its happening the most. Most of the time, kids who dont vape breathe in second-hand vape smoke in bathroom even in classes out in the open. Even though there are rules against kids buying them and using them it still happens worldwide. Teachers and Parents are very concerned. Seeing children taking the wrong road in life and taking vape as a choice. I choose to be smoke free and vape free, living a healthy life and keeping my lungs open. Please consider helping us fight vaping and keeping it out of the reach of youth like me!

Sincerely,

Desirae, 14

Vaping and e-cigs are big problems
for youth like me, especially in schools.
At school, there's kids in the bathroom
vaping and using e-cigs and when I
try to go see there's like 5 kids
vaping.

Sincerely,

John Ortiz

Dear City of North Port (Commissioners)

Vaping and using e-cigarettes are a very big problem for people as young as me. In school I see kids who use these vapes during school time. Even with all the rules against vaping kids still do it in school. I don't want to see anymore teens vaping in or out of school because I want to keep living a free and healthy life. I want to keep mine and other young youths lungs healthy. Please consider helping us fight vaping and keeping it out of reach of young adults like me.

Sincerely,

Kevin D.

Dear

City of Northport Commission (S).

Vaping and E-Cigarettes are a problem around my age of youth especially in school. I don't want to see or smell vapes in school or even out of school and it is also bad for the people around it. Please consider helping us fight vaping and keep it out of the hands of youth. If we please and thank U.

Sincerely

Seth S

Vaping and cigarettes is a big problem for youth like
me, especially in school hours. Most of the time kids that
don't vape and use these products during school
hours. Most of the time kids who don't vape breathe.

Sincerely

Alex. A
