Mural Plan Proposal for North Port Aquatic Park:

- 1) Approval of my painted sketch. Wall to be painted is 8 ½' H X 25' L. (1" = 1').
- 2) Removal of all things on the wall, except for the words. Clean up glues, etc. Save the 2 fish cut-outs for me.
- 3) Pressure wash wall to clean all areas.
- 4) Our background color will be painted 1st, in 2 coats to cover the beige wall. 2' of the top will be left in original color to preserve the aluminum wording, etc.
- 5) Waves will be painted throughout.
- 6) Design sketch will go on the wall.
- 7) Area needs to be cordoned off from the public.
- 8) Painting will begin! Painting design: Florida coral reef seascape. Above the waterline, a suggestion of some clouds and sunset colors , against the beige wall.
- 9) Most the individual fish & turtles will be hand-painted cut-outs applied to the wall, in between the donor plaques.
- 10) When the mural is complete, I will create a small activity book for children.
- 11) I understand this project would like to be completed by school summer break. So, we need to get started ASAP!

“FLORIDA CORAL REEF”

Proposal for Maintenance on The Mural Project at NP Aquatic Center:

Steps to Consider:

-  Frequent checking for vandalism & public disrespect for touching & harming the mural. City maintenance.
-  When it gets dusty or dirty, from the elements, etc, it'll need to have a soft-wash, to keep it clean. Don't use bleach, unless mold is an issue. City maintenance.
-  After several years, it may have to be re-sealed. That will be determined as needed. The preferred sealer is: Sherwin Williams “SherClear”. Contact artist if you have questions.
-  Let the artist know when help is needed for repairing/touching up public or environmental damage to the mural. There will be a fee of \$15/hour.
-  Because this large mural project is outside, vulnerable to weather and the huge North Port public, maintenance will have to be determined as needed!!

Thank You,
