Based on the 2021 BEBR report, North Port has grown an average of 3.04% per year over the past ten years. This percentage of growth would be a conservative figure to use for population projections at this time. We will be watching over the next couple of years to determine if the higher growth rate seen last year continues consistently. The Census July 2021 estimate for North Port was 80,021. Based on that estimate, by July 2023 we would see 82,453 and 84,959 by July 2024, and so on. Source: City of North Port
