

City of North Port

12200 San Servando

Cyclorama Building

This proposal is due to damage from Hurricane Ian to the Cyclorama Building at 12200 San Servando. The building is a circular CMU block exterior wall with a stick frame roof truss system. There is significant damaged to a portion of the roof decking and framing. We are proposing the following scope of work to temporarily secure the building from any further damage and to remediate the affected area.

1. Remove loose material from the roof
2. Reframe sections of the roof system with treated 2 x 6 boards
3. Install new roof sheathing where needed
4. Install a tarp with batten strips to properly secure tarp and to prevent tarp from blowing off
5. Clean up debris inside of the building

The price for this proposal is \$38,630.00.
