RE: RFB NO. 2019-65 Water Distribution System Improvements

Q1: In regards to the water services that must cross a travel way, driveway or sidewalk: Is it the city's intention to open cut these or directional drill a sleeve under the road? If open cut, how will restoration be paid for? If directional drill, what size sleeve?

A1: Services under roadways, we wouldn't anticipate a service under a driveway, would need to be installed with methods other than open cut. A two-inch sleeve will be sufficient for services crossing roadways.

Q2: Is this a Davis Bacon project?

A2: No.

Firms are required to acknowledge receipt of this addendum on their proposal forms. All other terms and conditions of the original proposal and contract documents remain the same.

**Q1:** The bid form has 3 driveway apron replacements in the Jeannin section. I can only see 2 on the plans. Is there a 3<sup>rd</sup>?

**A1:** The plans show driveway apron replacements at 1139 Jeannin Drive, 1111 Jeannin Drive, and 1326 Geranium Avenue.

**Q2:** The specifications direct us to include culvert pipe and headwall removal and replacement in the driveway apron replacement unit price. Could you specify if that is truly the intention and callout specifically what will be required at each of the locations?

**A2:** Any culverts and/or headwalls that are disturbed or removed to facilitate construction shall be restored or replaced by the Contractor to a condition equal to or better than which existed prior to the start of Work. This work shall be considered incidental to the Work being performed.

**Q3:** Will this be an owner direct purchase project?

**A3:** No.

**Q4:** Please clarify if and where silt fence is to be installed? Also confirm that silt fence is to be attached to 2"x4" posts per the specification language as this is not typically the case with standard silt fence.

**A4:** Silt fence is to be installed at drainage ditches, culverts, and storm inlets and at other locations where there is potential for sediment-laden runoff to impact surrounding areas. Hardwood posts measuring 1-1/2"x1-1/2" will be accepted in addition to the posts specified in Section 02050 – Environmental Protection.

Q5: As the running line of the pipe is 3' off the edge of roadway but in an unpaved area, what will be the density testing requirement/ frequency for this trench?

A5: In unpaved areas, a minimum of one density test per lift (beginning at the spring line of the pipe and extending to finished grade) shall be conducted every 300 linear feet of trench. The density shall be at least 98% of the maximum density determined by AASHTO T180 for areas within 10 feet of roadway pavements.
