**TITLE:** Review and approve the North Port Road and Drainage District Fiscal Year 2018/2019 Methodology Final Report.

### **Recommended Action**

Review and approve the North Port Road and Drainage District Fiscal Year 2018/2019 Methodology Final Report.

### **Background Information**

Ordinance Number 2014-01, amending Chapter 66, Road and Drainage District Article III, Section 66-52, enabling legislation for the Road and Drainage District, requires the methodology and rate studies be reviewed every four years. Staff recognized the need to revise the methodology and worked with Stantec Consulting Services, Inc. on the Apportionment Methodology, Allocation, Sufficiency, Rates and Future Projections.

On June 13, 2018, a Special Commission Meeting was held to discuss the Road and Drainage Study and review the pertinent scenarios and analyses for Fiscal Year (FY) 2019. The Commission direction from that meeting includes the following:

- Increase the District's assessment rates by 4.50% in FY 2019.
- Update the Mowing Assessment recovery to be based upon Equivalent Mowing Units (EMUs) where an EMU is a factor of 80 linear feet of frontage.
- Begin City mowing the swales of improved lots in the agricultural estates and include the estate's mowing costs in

the Primary, Secondary, and Tertiary Drainage Assessment.

- Provide option for property owners of vacant parcels to request City mowing services for a minimum time period if they meet certain criteria. This cost would be added to their annual Road and Drainage non-ad valorem assessment.
- Reapportion the total district costs to the appropriate assessment based upon the Cost of Service analysis conducted by Stantec and the City's Department of Public Works Staff.
