Good Afternoon Kyle,

Can you please send this one up through leadership on the proper way to handle this situation? Please correct me if I miss-speak Gerald. 😊

Gerald applied for a culvert permit between systems. Naviline shows this as rejected, and I have no documents. He was told by JR that this permit (24-00013485) was approved, but the new system was changing, and he would follow up with him. He paid the \$360 for the permit at Public Works and then was told nothing since then. So, what did he pay PW \$360 for?

He got the culvert to put in a carport. It looks like "Calvin Cook" (email: tandgcarports813@gmail.com) applied for a record with us (PCZC-25-00278) but never uploaded any documents. I can assume that once they realized what it would entail, they just built the carport and left. We would need a drainage site plan for review as the structure is 625 sqft.

Can we alter this record that is already paid for, and put it in Gerald's name, and have him upload the documents to fix this as an ATF record and include the culvert? I don't know why he was charged the \$360 for the culvert, if they would not provide the functionality or ability to complete the record they just charged him for.

He has a code case, and the description is below. It is for the building and damaging the CROW (City Right-of-way) with a hearing scheduled 6/25. If we can make this change, would this bring the CC into compliance to avoid the hearing?

Original Culvert Permit
24-00013485

Record for 25' x 25' Carport
PCZC-25-00278

Code Case
CECASE-26-01048
"Steel Free Standing Building Permit Not Finalized. Driving across CROW No Culvert."

Gerald Stackhouse's Info if you need him 😊
