Changes made by the City to the assessment methodology will not render this indemnity invalid unless the Consultant has notified the City in writing prior to adoption of the non-ad valorem ordinance that a particular change will likely lead to an insufficient or unenforceable assessment methodology, and the court expressly holds that that change was the sole reason that the assessment methodology was insufficient or unenforceable. The amount of the indemnity must be co-extensive with the amount of the Consultant's Errors and Omissions/Professional Liability coverage, which must not be less than \$1,000,000 per occurrence for this project with a \$1,000,000 policy term general aggregate, and such policy must expressly provide coverage for this indemnity provision. In the event the Consultant has failed to procure Errors and Omissions/Professional Liability coverage in the stated amount or has let such coverage lapse, the indemnity must still be enforceable up to the stated amount.

- The process will be followed as stated on pages 29-31 of this RFP.

8. DISCIPLINE AREAS/WORK ASSIGNMENTS TO BE PERFORMED

This section outlines the main task areas anticipated to be conducted under an awarded contract and the knowledge and skills needed within the associated disciplines to achieve success. The Consultant should demonstrate to the City the ability and capacity to successfully perform these tasks.

- A. Establish a methodology for the evaluation of fees, including impact and capacity fees. Review existing methodology, recommend changes as necessary and determine if fees are accurate and appropriate to the City's needs. Work with and meet with City staff to refine scope, purpose, uses, and goals. Ensure the study will be both accurate and appropriate to the City's needs.
- B. Conduct a comprehensive review of the City's existing fees, rates and charges. Meet with staff and conduct interviews as needed to gain an understanding of the City's processes and operations.
- C. Analyze the impacts of development on specific types of facilities and calculate recommended fees for each type of facility in accordance with the City's Code.

- D. Conduct a level of service analysis.
- E. Identify the total cost of providing each City service at the lowest reasonable activity level and in a manner that is consistent with all applicable laws, statutes, rules and regulations governing the collection of fees, rates, and charges by public entities. Costs should include appropriate General and Administrative overhead allocations to City activities and applicable overhead rates for use in calculating the City's billable hourly rates.
- F. Compare service costs with existing cost recovery levels. This should include service areas where the City is currently charging for services as well as areas where the City perhaps should charge, considering the City's practices, or the practices of similar and/or neighboring cities.
- G. Determine the full cost including direct and indirect cost of each unit of service provided by the water and wastewater systems including, but not limited to, inspection fees, fireline fees, final reads, initial reads, meter sets, re-reads and meter leaks.
- H. Assess the current rate structure's performance as a baseline for comparing recommended changes. Conduct a detailed review of the existing rates and status of the Utility Fund, and develop a general familiarity with the City's billing system.
- I. Develop and assess the effects of a transition plan whereby changes in customer class-based rates are phased in over a period of time to allow the City the ability to correct subsidies in their rates while minimizing the financial impact on any customer group.
- J. Based upon cost-of-service principles, develop equitable and defensible retail and bulk service rates and fees.
- K. Assess the equity of current recommended water and sewer rates for all types of property ownership.
- L. Assess the interactions between the water conservation elements of the rate structure and its impacts on the ability to fund water operations as well as the water conservation elements' impact on the economic wellbeing of the community including the impact of innovative water conservation measures including incentives and disincentives on the cost of water service and water rate(s) taking into consideration the City's water use permit requirements.
- M. Distribute the most recent fiscal year costs for each utility in an equitable manner between the customer classes, residential, commercial, and irrigation, including any large users. Consider conservation rates, inclining block rates, marginal cost rates, unmetered rates, fire protection rates, and rates for re-use of wastewater effluent.
- N. The prior methodology for the Fire Rescue services involves two (2) components which are imposed equally among all non-exempt tax parcels on a per parcel equivalent basis (Tier 1), and the other costs are apportioned among developed property based on the value of structures on the parcel (Tier 2), as determined by the county property appraiser. This methodology has been upheld in numerous challenges before the Florida Supreme Court. As a result, the methodology for the Fire Rescue services does not need to be evaluated. Additionally, the District's Non-Ad

Valorem Assessment roll data, along with the historical and budgeted financial information is used to populate the Financial Analysis and Management System (FAMS-XL©) interactive model. This model has been determined to be valid, reliable, and understandable. As a result, only the following tasks may be performed:

1. Update the Ten-Year Revenue Sufficiency Analysis (prepared in conjunction with the annual budget season).
 2. Update the Fire Assessment Roll (performed during the spring and finalized in September).
- O. Include the preparation of detailed customer forecasts and billing analyses, identification of expenditure requirements to be funded from rates, development of capital improvement funding plans, evaluation of financial performance and policy development, and design of various utility rates and service charges.
- P. Promote compliance with rate covenant, additional bonds test, and flow funds provisions based on authorizing bond documents and maintain credit rating position.
- Q. Recommend ways of communicating system costs, conservation/waste reduction methods and practices, and possible rate adjustments.
- R. Prepare reports that identify each facility or service, its full cost, current and recommended cost recovery levels. Reports should identify the direct cost, the indirect cost, and the overhead cost for each service; and provide a model for adjusting these fees and rates for the City's current and future needs.
- S. Work with City staff to review and evaluate future needs and services of the City in order to incorporate these needs into the recommendations.
- T. Work with City staff to conduct an assessment regarding the impacts on each department with links to the fee structures to determine which City cost centers are applicable.
- U. Recommend appropriate fees and charges. Recommended fees are based on the analysis, together with the appropriate subsidy percentage for those fees where full cost recovery may be unrealistic.
- V. Prepare reports that identify the current fees, and recommended fees. The reports must also identify percentage change, cost recovery percentage, and fee comparison with other cities or service providers that are comparable to North Port, Florida. A survey comparison of rates and fees with similar cities will be used to help determine the appropriate level of subsidy, if any.
- X. Research and prepare District Assessment and Methodology reports, draft and final. Recommend the categories of property to be assessed and determine the relative benefit anticipated to be derived by those categories of property found within the City that receive services. Recommend the fair and reasonable apportionment of assessable costs among benefited parcels within each category of property. Determine the rates required to fully fund the cost of services provided by the City to various parcels or users that benefit from the City's services. Methodologies are

anticipated to remain in effect for a three (3) year period and the Study will reflect a method to adjust the level of assessment sufficient to continue funding the budgetary requirements through that period.

- Y. Attend project commencement meetings with City representatives at City offices.
- Z. Conduct progress meetings and written progress reports as requested by the City, or as Consultant deems necessary.
- AA. Consultant may develop public information materials including web site, brochures, FAQs, or other media tools as may be appropriate or requested by the City.
- BB. The Consultant may be required to conduct presentations for the Commission and the general public. All material and format must be approved by City staff prior to any presentation.
- CC. The Consultant may assist in the draft of all legal notices, publications, documents, and resolutions necessary to certify and adopt the rate structure as requested by the City. The Consultant must submit “drafts” of all documents, including a draft agenda for the required public hearings, to the City for review with sufficient time for publication and adoption prior to statutory deadlines.
- DD. For yearly non-ad valorem assessments, create and maintain an assessment roll based on the final methodology approved by the City Commission and deliver the assessment roll to the City within the time frame and format acceptable to the City and the Sarasota County Tax Collector.
- EE. All materials, in any format, produced by the Consultant for the City during the course and scope of services are considered the property of the City.
- FF. Provide a database for a mail merge process with property specific data to assist with the preparing first class mailing notices, as needed.

9. PROCEDURE & SELECTION OF CONSULTANTS WITHIN THE CONTRACT

A. Work Assignments

Work Assignment size may vary. No guarantee is expressed or implied as to the quantity of services, if any, to be procured under this Request for Proposals by the City.

Florida State Statute Limits – A “continuing contract” is a contract for professional services entered into in accordance with all the procedures of this act between an agency and a firm whereby the firm provides professional services to the agency for projects in which the estimated construction cost of each individual project under the contract does not exceed **\$4 million**, for study activity if the fee for professional services for each individual study under the contract does not exceed **\$500,000**, or for work of a specified nature as outlined in the contract required by the agency, with the contract being for a fixed term or with no time limitation except that the contract must provide a termination clause. Firms providing professional services under continuing contracts will not be required to bid against one another.

Any work assignment **\$100,000** or greater requires Commission approval.

Reasonable attempts will be made to equalize projects amongst qualified candidates in terms of project worth provided such distribution does not violate the principle of selection of the most highly qualified firm responding to a particular letter of Interest. The respondent to a Letter of Interest deemed most qualified will be chosen to submit a scope and fee for the Work Assignment.

NON-EXCLUSIVITY: No guarantee of certain services, volume of work, or quantity of projects is implied. This contract does not entitle any firm to exclusive rights to City contracts. The City reserves the right to acquire professional services from other firms or perform "in-house" services for any purpose as it deems appropriate. The City may, in its sole discretion, procure the services of any Consultant at any time for any project other than those selected for this continuing contract.

B. Letter of Interest Process

When the City requires professional services, it is anticipated, but not necessarily required, that the process will proceed in the following manner:

1. For each specific project to be completed under a continuing services contract, Public Works will send a Letter of Interest to all qualified firms awarded the continuing services agreement. The letter of interest that will include, but not be limited to, the following information along with request for interested firms to submit a qualifications-based proposal for the specific project.
 - a. Project description;
 - b. General scope of work;
 - c. Goals of project;
 - d. Potential unknowns;
 - e. Any special conditions associated with the project;
 - f. Proposed schedule for project;
 - g. Proposed budget for project;
 - h. Limited references request;
 - i. Limited page limit on qualifications-based project-specific proposal; and,
 - j. Deadline for submittal of qualifications-based proposal for the project.
2. Each firm will then have the opportunity to submit a qualifications-based proposal for the specific project.
3. City staff will evaluate the qualifications-based proposals on general criteria including, but not limited to, the following:
 - a. Understanding of project and required deliverables;
 - b. Ability and relevant expertise/qualifications of the firm's personnel to be used in performing the service;
 - c. Availability of staff and ability to meet project schedule;
 - d. Evaluations on prior City projects.
 - e. Firm's proposed cost saving measures for the project,

- f. Conflict of Interest form,
 - g. Disclosure form for Consultant/Engineer/Architect,
 - h. Scrutinized Company Certification Form,
 - i. E-Verify Form; and,
 - j. FEMA forms as applicable per checklist
4. City staff will obtain from selected Consultant a finalized detailed scope with tasks, fee schedule based on hourly rates submitted with master contract, and project schedule. Negotiations may be required to fine tune scope and issue a Work Assignment.

The City reserves the right to be the sole determination of responsiveness and responsibility of any submittals received in response to requests for proposals, requests for qualifications, and/or letters of interest.

The Consultant must neither commence any Work, nor enter a City Work premise, until the Consultant has received a **fully executed Work Assignment** from the City serving as written Notice to Proceed (“NTP”).

The parties agree that the scope of services for any Work Assignment is a description of Consultant’s obligations and responsibilities and is deemed to include preliminary considerations and prerequisites, and all labor, materials, equipment, and tasks which are such an inseparable part of the work described that exclusion would render performance by Consultant impractical, illogical, or unconscionable.

Consultant and City acknowledge that Scope of Services may not delineate every detail and minor work task required to be performed by Consultant to complete the Project. If, during the course of the performance of the services included in the Work Assignment, Consultant determines that work should be performed to complete the Project which is in the Consultant’s opinion outside the level of effort originally anticipated, whether or not the Scope of Services identifies the work items, Consultant must notify the City in writing in a timely manner before proceeding with the work. If Consultant proceeds with said work without notifying the City, said work will be deemed to be within the original level of effort, whether or not specifically addressed in the Scope of Services. Notice to the City does not constitute authorization or approval by City to perform the work. Performance of work by Consultant outside the originally anticipated level of effort without prior written City approval is at Consultant’s sole risk.

Consultant acknowledges and agrees that services under this Contract will be requested by City on an as-needed basis only, and no representation or guarantee is made by City to Consultant that City will utilize Consultant’s services exclusively or at all.

C. Direct Work Assignment Process:

Upon approval from the Sr. Purchasing Administrator or designee, City staff may forego the Letter of Interest Process and proceed directly with the Work Assignment process. A scope with itemized tasks and fee schedule based on contracted hourly rates will be obtained from one of the contracted firms, reviewed, negotiated, and awarded. This process will be used when circumstances warrant a more expedient process.

10. INVOICING

Consultants must invoice the City for each project or assignment, as negotiated. Each invoice must identify the invoice number; project or assignment; detail the contract price; payments made to date; percentage of completion of the assignment/project/phase and/or employees names, titles, direct labor rates, and multiplier; payment due this invoice; remaining balance due; attached list of approved reimbursables with appropriate receipts. Invoices must itemize hours, hourly wage, or other unit agreed upon as measurement of payment during negotiations, if requested. If hourly, invoices must identify the name and title of personnel who performed the work.

Invoices must also include a detailed bullet list of work completed within the period of the invoice. Bullet list of work completed must clearly identify the work associated with the current billing.

11. COMPENSATION

Direct costs are not reimbursable. Direct costs are defined as, but not limited to, the use of communication equipment, computers, copiers, and all other equipment required to perform services. Mileage and meals are considered direct costs and are not reimbursable.

Compensation to the Consultant must include the following: all profit, direct and indirect labor costs, personnel related costs, overhead and administrative costs, and all other costs not indicated as non-reimbursable below.

No claim for reimbursement for these expenses will be made to the City:

- A. All travel and vehicle related expenses within Sarasota County, Charlotte County and DeSoto County. (Types of travel outside these counties to be considered during negotiations).
- B. Three (3) sets of signed and sealed permitting plans.
