163.3163 Applications for development permits; disclosure and acknowledgment of contiguous sustainable agricultural land.—

(1) This section may be cited as the “Agricultural Land Acknowledgment Act.”

(2) **The Legislature finds that nonagricultural land which neighbors agricultural land may adversely affect agricultural production and farm operations on the agricultural land and may lead to the agricultural land’s conversion to urban, suburban, or other nonagricultural uses.**

The Legislature intends to reduce the occurrence of conflicts between agricultural and nonagricultural land uses and encourage sustainable agricultural land use. The purpose of this section is to ensure that generally accepted agricultural practices will not be subject to interference by residential use of land contiguous to sustainable agricultural land.

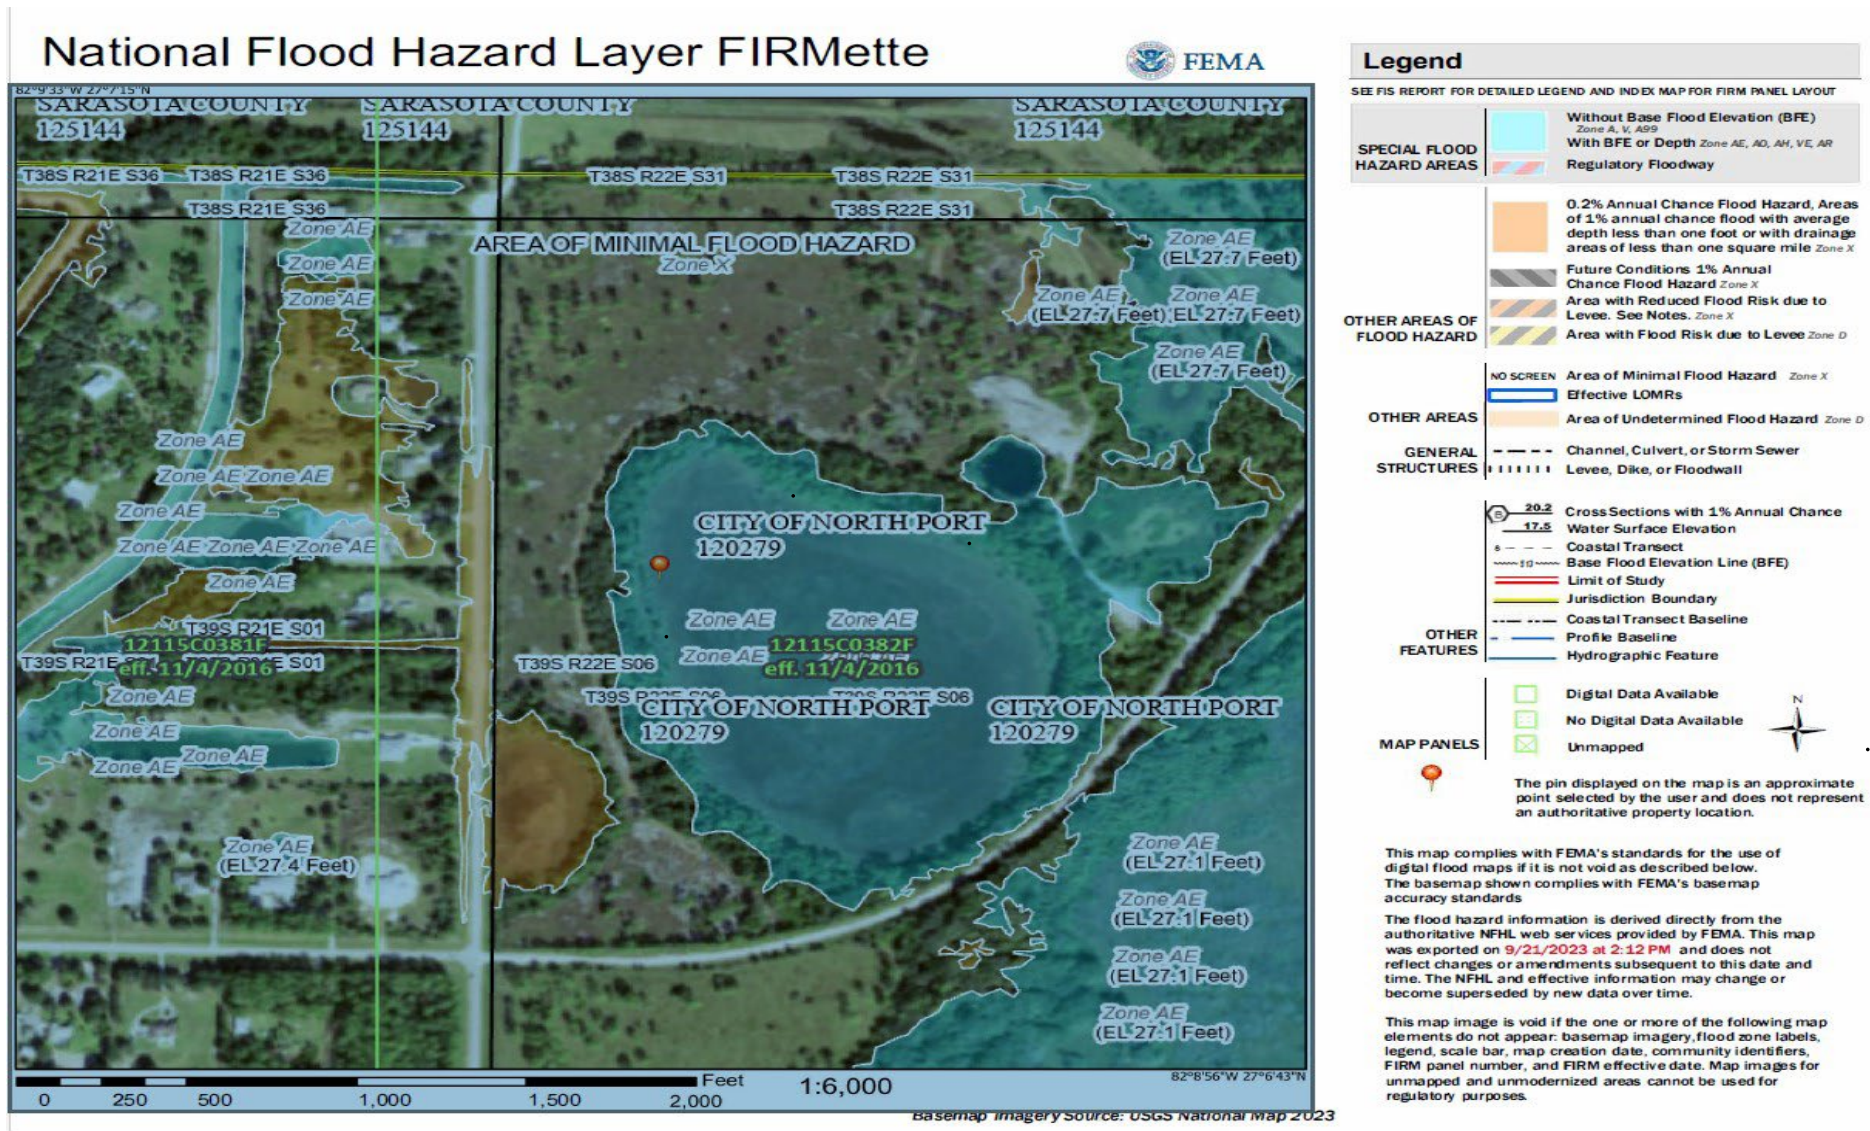

(3) As used in this section, the term:

(a) “Contiguous” means touching, bordering, or adjoining along a boundary. For purposes of this section, properties that would be contiguous if not separated by a roadway, railroad, or other public easement are considered contiguous.

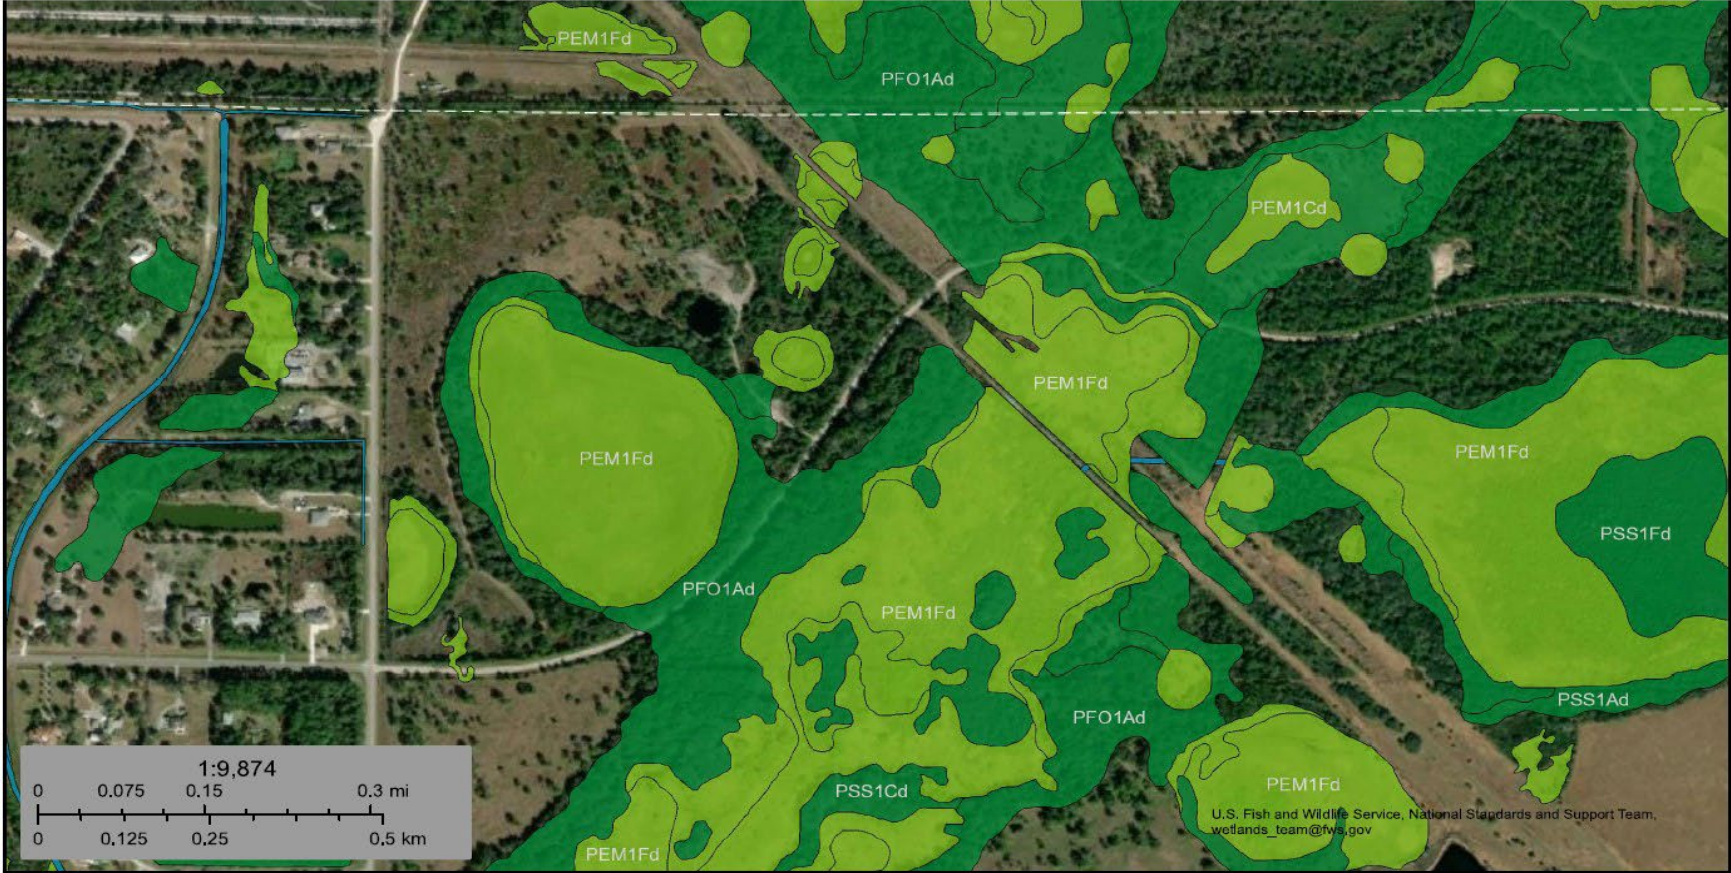

(b) “Farm operation” has the same meaning as defined in s. [823.14](#).

(c) “Sustainable agricultural land” means land classified as agricultural land pursuant to s. [193.461](#) which is used for a farm operation that uses current technology, based on science or research and demonstrated measurable increases in productivity, to meet future food, feed, fiber, and energy needs, while considering the environmental impacts and the social and economic benefits to the rural communities.

Lori and Carl,

Doing my weekly check-in as I have to report to our client on the status by Friday.

Has legal finalized their review? As you know our client is very much in need of going before the PZAB in July.

Also, what is the city's process for a lot split. I cannot find any guidance in the ULDC. We need to work on creating the parcel, based on the legal description for the ILW portion, to be able to sell it to the end user/developer of the light industrial uses.

Thanks!

Ken
