Twelve Month Impact Statement

Define your non-profits missions/goals?

At this time, we do not yet have measurable data to report, as the building is still undergoing renovations. The appliances and other equipment have not yet been put into use. Renovation work is progressing after a long period of permitting, and we anticipate welcoming families into the space once the work is completed and the dust settles—projected for February.

We sincerely apologize for not being able to provide outcome data at this stage, but we are confident that once operational, the building will serve its intended purpose and allow us to measure and demonstrate meaningful impact moving forward.

Indicators or methods used to measure impact?
