## Tab 3 – Quality of Product / Warranty

# COMPLIANCE

Industry standards set a minimum level that playground manufacturers must meet. We meet or exceed those standards, because we understand that the ultimate playground offers peace of mind, as well as playful experiences.

## AMERICAN SOCIETY FOR TESTING AND MATERIALS (ASTM)

---

Several key people at GameTime, including our Manager of Compliance and Standards, serve on the ASTM committee that sets the standards for the entire playground industry. GameTime products conform to that standard, ASTM F1487- 11, the Standard Consumer Safety Performance Specification for Playground Equipment for Public Use.

## CPSC

---

The Consumer Product Safety Commission is an independent agency within the United States Federal Government with the authority to inform the public of current product safety performance information and recommended practices. The CPSC first published their guidelines for public playgrounds in 1981 and have updated their publication since then. The current CPSC Handbook for Public Playground Safety, publication #325, is an excellent guide for owners and operators of public play environments.

## IPEMA EQUIPMENT CERTIFICATION

---

GameTime is one of the founding members of IPEMA, and several of our people serve as board members, committee members and chairpersons of the association. In the interest of public playground safety, IPEMA provides a 3rd party certification, to validate conformance to established standards. Our use of the IPEMA seal is your assurance that GameTime has received written validation from an independent lab that the products associated with the seal conform with the ASTM standard, as well as the Canadian CSA standard CAN Z-614. A list of our validated products may be found on the IPEMA website, [www.ipema.org](http://www.ipema.org).

## IPEMA SURFACING CERTIFICATION

---

GameTime's GT Impax product provides you with the assurance that our surfacing has been certified as compliant to the appropriate ASTM standard. In the interest of public playground safety, IPEMA provides a third party certification to validate a manufacturer's conformance to the ASTM F-1292-99 Standard Specification for Impact Attenuation of Surface Systems Under And Around Playground Equipment. The use of the IPEMA Certification Seal signifies that the manufacturer has received written validation from the independent laboratory that the product associated with the use of the seal conforms with the requirements of ASTM F1292-99. A complete list of our validated products may be found on the IPEMA website at [www.ipema.com](http://www.ipema.com).

## ADA

---

GameTime is the only manufacturer to have a lab partnership with an Institute for children with special needs, so that we can develop and test our accessible products before bringing them to market. GameTime is the only manufacturer to meet accessibility guidelines on all of its pre-designed PowerScape and PrimeTime playground plans. We also recommend accessible surfacing options. For more information, log on to [www.access-board.gov](http://www.access-board.gov)

## ISO 9001:2000

---

GameTime is the first playground manufacturer to obtain the ISO 9001:2000 standard. In order to obtain this certification, the company's manuals, policies, objectives and quality procedures are closely examined during a surveillance audit by ISO representatives. Strict attention is paid to policies and procedures in manufacturing, communication channels, system monitoring, customer relations and order processing, which are reviewed for consistency and standards. Companies who meet the standard are awarded the ISO designation.

## TUV

---

An international organization that is a European Union Notified and Competent Body, providing testing and certification. Use of the TUV seal demonstrates that products have passed a comprehensive testing procedure based upon the European Harmonized Standard for Commercial Playground Equipment, and that the GameTime plant is regularly monitored by TUV.

**Permits are not included in cost, unless specifically listed in pricing.** If permits are required Signed/Sealed drawings are needed and are also not included unless specifically listed in pricing. Any costs for municipal permits, paid by installer, will be charged back to the owner. Adding permits to any job will increase the length of completion, expect total time to be about **150 days**, after receipt of Site Plan from owner/customer (this is not due to manufacturing but rather the permit process at the municipality level). It is expected that the **owner will provide approved site plans** of the area for the permit office, and will help and assist in the securing of all required approvals before assembly of equipment can begin. Installer cannot provide site plans. **The permit process can not begin until appropriate and current site plans are provided by owner.** If there are no current surveys or site plans available, the owner may be required to obtain a new survey for the permit. This is the responsibility of the owner to obtain. If additional permitting requirements are needed during the process, those will be added and billed accordingly, i.e. soil density test, formed footers, etc.

GameTime's per occurrence insurance policy is one of the strongest in the industry. By definition, a Per Occurrence policy provides coverage for an accident that occurred during the term of the policy, even if the policy is subsequently changed or terminated. This is superior to a Claims Made policy, which does not provide such coverage. The certificate pictured is for informational purposes only, and may not be current. A copy of the current certificate is available on request.

## RECYCLED AND RECYCLABLE CONTENT

Environmentally responsible play systems that last for decades, not years.

### OUR PLAYGROUNDS ARE DESIGNED FOR FAMILIES AND TO MINIMIZE THE IMPACT ON THE PLANET WHERE WE PLAY.

It's our responsibility to act as stewards of our planet and its natural resources. It's also our mission to create fun, active, and innovative places for families to gather and play. Our environmental sustainability efforts are intended to help ensure children of today can take their grandchildren to playgrounds in the future. Our approach to stewardship and sustainability encompasses every aspect of our company - from the way we manufacture our products to how we do business. Children learn many valuable life skills on playgrounds. We've learned some important lessons, too. We continuously strive to be environmentally responsible and to make sure future generations benefit from our efforts.

### RECYCLING (ANNUAL)

Cardboard: 26.1 tons	Ballasts: 25
Paper: 9.4 tons	Fork lift batteries: 15
Scrap plastics: 137.1 tons	PVC trimmings: 2.4 tons
Computer equipment: 5,135 lbs.	Steel: 3,404,260 lbs.
Plastic bottles: 26,568	Aluminum: 23,568 lbs.
Fluorescent bulbs: (4') 240	

### 125,000 INDIVIDUAL PARTS 400,000 SQUARE FEET ONE ENVIRONMENTAL COMMITMENT

- We work with our suppliers to source the most environmentally preferable materials for our products.
- We include as much pre-consumer and post-consumer recycled content in our products as possible – without compromising the quality, durability, and performance.
- We're updating light fixtures, upgrading air compressors, and conducting energy audits because every small improvement leads to significant reductions in our overall environmental impact.
- We've implemented a variety of initiatives to reduce water consumption in our facilities, including the use of high-efficiency technology for product painting and washing.
- We recycle the vast majority of waste at our manufacturing facility, including 100% of manufacturing process waste like scrap metal, rotationally molded plastic and paper. We recycle the majority of our administrative waste, too.

## INSTALLATION EXCELLENCE

Our manufacturer-specific training course is unique and is acknowledged in the industry as a program that should be a model for all.

### INSTALLERS WHO SHARE OUR VISION

---

We want to make sure our installers know safety regulations, industry standards, and how they apply when installing equipment. It is important to us that your installation process goes smoothly, and that everything is done to our exacting specifications. It isn't enough to send our installers to a third party

certification program. We want to meet them, teach them, and make sure they know how to install products. All playground equipment is different, and we want to ensure that when they learn how to put a play structure together, they are training on one of ours.

### CERTIFICATION MATTERS

---

GameTime's exclusive Certified Installer Training course has a two-part curriculum. First attendees learn about installation in a hands-on lab where they assemble play structures under the watchful eyes of our on-staff professionals. They learn about new products, modifications, and new industry information. They are also instructed on CPSC, ASTM, and industry regulations in relation to our products and proper installation. They learn how to properly locate and drill ground holes, recognize and avoid underground utilities, and use the tools needed to ensure an accurate installation.

The course also includes a lecture series, with focuses on risk management, insurance and many other topics that give installers the knowledge and skills to make your playground everything you expect it to

be. With this training, we can have the confidence all of our playgrounds are being installed correctly, expertly, and to the exacting standards we maintain throughout the process.

This manufacturer specific training course is unique to GameTime, and is acknowledged in the industry as a program that should be a model for all. It's just one more thing that sets GameTime apart, and one more reason you can trust us to be your playground company.

## MAINTENANCE

Our comprehensive guide will help you maintain your playground.

### IMPORTANCE OF MAINTENANCE

Designing and building a GameTime playground is an important first step in creating play opportunities that enrich the lives of children and the community in which they live. Once the playground is open, however, it is equally important to perform regular inspections and maintenance to ensure your investment, and the benefits it represents, is protected.

The National Recreation and Parks Association's Certified Playground Safety Inspection Course estimates that nearly 40% of all playground injuries occur due to improper or neglected maintenance.

To help you create an inspection and maintenance program for your playground, GameTime developed a comprehensive Playground Maintenance Guide to help you maintain and protect your playground.

### CUSTOMIZED MAINTENANCE KIT

We provide a customized maintenance kit with every play system. Each kit includes:

- Touch up paint customized to your selected color palette to touch up nicks and scratches cause by wear and tear and/or vandalism
- Graffiti Remover designer to remove unwanted paint from plastic and metal without damaging the finish underneath
- Customized toolkit specifically for the bolts, fittings, and connections on your play system
- Instruction manual with easy-to-read assembly instructions for every component on your system

# PLAY ON!

## National Demonstration Sites

### PROMOTING YOUTH PHYSICAL ACTIVITY THROUGH ACTIVE PLAY

The purpose of Play On! is to promote physical activity and fun through the use of thoughtfully designed outdoor play environments and creative playground learning activities. The Play On! program provides educators and recreation professionals evidence-based best design practices to promote health and wellness — maximizing the value and potential of school and community playgrounds. PlayCore is proud to partner with physical activity experts, SHAPE America, to provide a valid solution for intentionally increasing physical activity on playgrounds through six key elements of play to promote fitness.

Play On! can be used to enhance recess, physical education, before/after school programs, special events, camps, and other programming efforts that focus on combating sedentary lifestyles and childhood obesity. The Play On! curriculum contains 125 activities for grades PreK-5 that align with national physical education standards. The program includes assessment tools, equipment lists, playground funding opportunities, send-home family resources, and design best practices. Play On! can become a vital component in efforts to strengthen, educate, and build healthier communities through play and recreation.

### EVIDENCE-BASED DESIGN

Your project thoughtfully meets the following design best practices:

- Incorporates six key elements of play that promote your physical activity — balancing, brachiating, climbing, spinning, sliding, and swinging.
- Provides a developmentally appropriate progression of skill opportunities through beginning, intermediate, and advanced playground activities.
- The overall design encourages movement and moderate to vigorous levels of activity.
- Playground programming utilizing your Complementary Play On! curriculum can further encourage active play! The program includes 125 playground activities for PreK-5th grade.

### NATIONAL DEMONSTRATION SITE BENEFITS

High-quality play environments have a critical role in promoting community health. Research indicates that when evidence-based design principles are implemented within the built environment, positive outcomes occur.

Your National Demonstration Site ensures that your community maximizes the value of your investment.

### RECOGNITION & ADVOCACY

- Complementary signage installed at your site to create awareness, recognize your leadership, and gather visitor feedback.
- Welcome Kit with National Demonstration Site project of excellence award.
- Marketing Tool Kit with digital tools and tips to help promote your site to the public and encourage data collection engagement with visitors.
- Recognition on the National Demonstration Site Map, an online resource to help others find high-quality play and recreation destinations in their community.

### DATA COLLECTION & OUTCOMES SHARING

- Signage on site includes a QR Code directing visitors to share their experiences.
- Three site-specific reports provided by CORE Data Service Lab aggregate local and site-collected data to demonstrate the impact, engagement, and park user sentiments. Each report aligns with the 7 indicators of Community Vitality to provide a holistic view of the health and wellness outcomes you site contributes to the community.

### What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

### Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they
