Re: Request for Proposal No. 2023-41 – Construction Engineering and Inspection Services (CEI) & Geotechnical Engineering Services for Price Boulevard – Phase I Widening Project

Dear Selection Committee Members:

AECOM Technical Services, Inc. (AECOM) is excited to present our qualifications in response to the referenced RFP. Our proven management ability, depth and breadth of staff, team member experience, work quality, team reliability, and local presence are the cornerstones that makes AECOM perfect for this contract. We have assembled a comprehensive, locally experienced, and diverse team of professionals to serve the City of North Port, including team members who are North Port residents.

We are a full-service Architecture/Engineering (A/E) and CEI firm with over 1,200 talented people throughout Florida, including more than 120 CEI personnel statewide. Our firm has been providing professional CEI services in Florida since 1987. We pride ourselves on providing our clients with CEI services that bring their projects in on time and within budget, while providing maximum safety and convenience to the public. Our work is solid, and our team members are reliable and responsible.

We have included all the requested information in our response, which outlines why AECOM has the credentials, knowledge and experience to complete this job. In addition to this transmittal letter, our response includes:

TAB 2: Qualifications of the Firm – AECOM will staff this project utilizing CEI personnel based in our Sarasota field office. Projects with similar experience include: I-75 (SR 93) at Clark Road (SR 72), Sarasota County, FL; US 41 at Biscayne Drive and Price Boulevard at Biscayne Drive Intersection Improvements, City of North Port, FL; North Port Pedestrian Lighting, City of North Port, FL; US 41 Venice Bypass from Center Road to Gulf Coast Boulevard, Venice, FL; Honore Avenue/Pinebrook Road Extension, Phase VII, Sarasota County, FL; I-75 (SR 93) Widening from Sumter Boulevard to River Road, Sarasota County, FL; I-75 (SR 93) at SR 64 Interchange Improvements, Manatee County, FL; and Legacy Trail Extension, Sarasota County, FL. This local experience provides the team the ability to address and remedy any potential issues that may arise on this contract.

TAB 3: Key Personnel/Qualifications of the Project Team – The locally chosen AECOM team members are leaders in CEI and were handpicked for this roadway project due to their history of success, local presence, expertise, availability, and ability to deliver excellence. All staff assigned to this project are available to the City for the duration of your project, as necessary. The AECOM team proposed for this assignment has been working together as a cohesive unit in successfully building roads and pedestrian infrastructure, CEI, and contract management projects. They bring significant experience working on municipal and FDOT projects locally and around the state, so the implementation of federal, state and local requirements will be second nature.

We assign our staff to projects based on matching their particular skills and qualifications to the project at hand. The team we are proposing is well-versed in documenting compliance with contract documents and agency requirements, and in proactive, effective communication with the City and its contractors to avoid delays and budget overruns. Our CEI **Senior Project Engineer, Sandra Boudreau, PE, PMP** has served in a similar capacity for various clients, including previously serving Sarasota County as their Construction Manager for Transportation Capital Improvement Projects. She is extremely well organized and experienced in managing these types of projects and working with the public.

TAB 4: Team’s Previous Experience/Proficiency in Similar Projects – Nearly all our past, local projects are described in this proposal. We are experts in providing CEI for standard construction elements for any type of transportation project. AECOM personnel also prides themselves on keeping abreast of current construction issues or trends that are ongoing throughout the state. Additionally, AECOM is familiar with the City of North Port, having completed US 41 at Biscayne Drive and Price Boulevard at Biscayne Drive Intersection Improvements, US 41 Pedestrian Walkway Lighting, and Biscayne Drive Bike Lanes projects for the City. Information about the success of these projects is included in this section.

TAB 5: Management Approach/Project Control – Our approach is simple: Get the job done quickly, accurately, and cost-effectively. We can’t – and don’t – leave project management to chance. Our successful history of delivering these types of projects stems from continual refinement of our management and technical strategies coupled with innovative solutions. We take ownership for solving our clients’ problems, anticipating new opportunities, and setting industry standards for CEI service and delivery. In addition, we cultivate a good CEI-Contractor relationship at the beginning of the project which allows issues to be resolved quickly and at the lowest possible level. Through our experience, we have put systems and procedures in place that encourage good communication and accurate documentation, which produces a quality project that you will be proud of.

TAB 6: References – Transportation and infrastructure have been our bread-and-butter work since opening major, permanent operations in Florida in 1957. Of particular relevance, we have served dozens of county and municipal clients statewide in addition to all FDOT Districts, and in a number of cases, these services have been continuous for over 26 years. This longevity attests to the high caliber of our services and our commitment to our clients.

TAB 7: Litigation and Insurance, TAB 8: Additional Information, and TAB 9: Submission Requirements and Required Submittal Forms – Five-year litigation history and liability insurance coverage, a short overview of AECOM’s Florida CEI group, value added capabilities available with AECOM and required forms are included in these sections.

Why AECOM is the Right Choice

As you read the information provided in our proposal, you will gain a better understanding of the tools we employ to plan our projects, to communicate clearly with all stakeholders, and to execute our plan ensuring we successfully complete projects to the standards required by our clients. AECOM is committed to providing a successful project to the City of North Port. We look forward to the opportunity to discuss our qualifications and ideas with you in more detail. AECOM has reviewed The City of North Port’s Request for Proposals for Construction Engineering and Inspection Services & Geotechnical Engineering Services for Price Boulevard - Phase I Widening Project (RFP No. 2023-41). While we are in substantial agreement with the terms included therein, in the event of award, we hereby respectfully reserve the right to negotiate final contractual provisions that are in line with the requested Program Management Services. Should you have any questions or require additional information, please feel free to contact me at 813.927.6887 at your convenience.

Respectfully submitted,

AECOM Technical Services, Inc.

TAB 2. QUALIFICATIONS OF THE FIRM

AECOM is a full-service Architecture/Engineering (A/E) firm that designs, builds, finances and operates infrastructure assets worldwide for public and private sector clients. We are a global provider of professional technical and management support services and a leading, fully integrated infrastructure and federal services provider with approximately 50,000 employees in 150 countries. **AECOM is the #1 ranked Transportation firm in Engineering News-Record's The Top 500 Design Firms Sourcebook.**

AECOM has 1,200 talented people located throughout Florida, and more than 120 CEI personnel statewide, nearly 30 of which are based in AECOM's southwest Florida offices. Our in-house capabilities include CEI and construction program management, design, planning, environmental, landscape architecture and surveying. The proposed AECOM team has successfully worked together on many similar infrastructure construction projects throughout Florida for both city and county governments, including Sarasota County, City of North Port, Collier County, Lee County, City of Marco Island, City of Fort Myers, City of Cape Coral, Hendry County, and FDOT District One. We are prequalified by FDOT in CEI Work Groups 10.1, 10.3, 10.4, 10.5.1, and 10.5.2. Our Florida Professional Engineering license number is 8115.

Qualification Requirements

AECOM, a California corporation, was incorporated in 1970. AECOM is registered as a legal entity in the State of Florida and is not a minority or woman owned business. While a large firm, we have enjoyed a local presence through our CEI and utilities practices since 1987. AECOM's Florida Certificate of Good Standing is included in TAB 9.

Team Strength and Skills

AECOM will staff this project with CEI personnel based in our Sarasota office, and who reside in southwest Florida. The AECOM team proposed for this assignment has well over 100 years of experience, collectively, providing CEI and contract management. These CEI professionals have recent experience working on City of North Port projects, such as US 41 at Biscayne Drive and Price Boulevard at Biscayne Drive Intersection Improvements, and the Biscayne Drive Bicycle Lanes Project, making us intimately familiar with City procedures and thereby eliminating any learning curve. The AECOM team also brings significant experience working on municipal and FDOT projects locally and around the state, so the implementation of federal, state and local requirements will be second nature.

Our team will be led by **Sandra Boudreau, PE, PMP**, an experienced Project Engineer with 16 years of experience covering design, construction and maintenance of public infrastructure. Sandra was previously the Construction Manager for all Sarasota County Transportation Infrastructure projects from 2019 – 2022. Her previous work with the County also included design project management and right of way acquisitions for those design projects.

The City will benefit from AECOM's contracting and internal FDOT experience. This experience has allowed us to cultivate client confidence which thereby allows us to make justifiable field decisions in the field and keep the project progressing. Our team members are cross trained, giving them the ability to serve in multiple roles on the same project. This will provide the City with project efficiency and cost savings. When reviewing our resumes, you will see our team's qualifications/certifications meet or exceed the requirements set forth in the RFP.

While we have worked with some of the largest transportation contractors in Florida, we have also worked with smaller local contractors – we understand the strengths and weaknesses of each

and can adapt to help any contractor build the job with success. We bring to the City of North Port problem solving techniques and excellent communication skills, and we pride ourselves on building a benevolent relationship with contractors, the City, and stakeholders. A testament to our capabilities is our repeat business. Our clients provide positive feedback and top performance grades.

Availability to Provide FDOT Certified Personnel

Our team members have the FDOT Certifications expected to provide CEI services for this substantial construction project. As shown in TAB 3, the Team Member Qualification table highlights the specific qualifications and availability of our FDOT Certified personnel and is further detailed on their SF330 resumes.

Philosophy in Providing the Services Requested

Our goal is to monitor the contractors' work for compliance with contract documents while focusing on pushing, guiding, assisting, and educating the contractor, enabling them to complete projects on or ahead of schedule. We understand that time is money – for the City, for the taxpayers, and for the contractor. Our mantra is, **if you see something, say something! No rework!** We pride ourselves on our attention to the details.

We are not afraid to make decisions, as long as we have sound justification for those decisions. When we present issues or challenges to the City, we will always provide at least one or more potential solutions. Our recommendations will take into consideration the root of the issue and analyze it from each site-specific situation to its potential global or policy implications.

We strive for quick and responsive resolutions, and will work diligently to discover ways to minimize change orders using our proven process:

- **Be proactive and stay ahead of issues before they occur.** Provide a careful review of contract documents, investigate existing site conditions, and have thorough discussions and meetings.
- **Question why the issue occurred, not just what has happened.** Take a step back and look at the events that have transpired to assist with determining entitlement.

- **Organize all the facts and information gathered.** Summarize the details and provide recommendations for moving forward. Provide benefits/consequences of each recommendation.

Through our experience, we have found that transparent, professional communication and partnering are key to completing a successful project. We maintain an open dialogue with the contractor, asking them questions during progress and pre-activity meetings, such as: “Have they thought about their upcoming traffic switch?” and “Have they scheduled enough night crews to meet the lane closure restrictions?” We engage with the Engineer of Record and work as a team to clarify plans or specs, so together we can find the correct path forward for the project. We incorporate the City’s PM as our colleague so there are no surprises during the project. We also believe that using the latest technology, whenever possible, promotes quality and efficiency throughout the life of the project.

Hold Contractor Accountable for Their Project Schedule. The AECOM team will ensure the schedule remains the focal point by discussing, in detail, the schedule status and Two-Week Look Ahead at the weekly progress meetings. The contractor’s schedule update should reflect construction progress during the previous month. The contractor may choose to modify his sequence of events and activities or alter durations. We will ask why and then determine its effect on the overall project. If the update is accepted, the submitted schedule then becomes the basis for future, “scheduled vs. actual” activity analysis.

Two-Week Look-Ahead. The AECOM team will ensure the contractor’s two-week work plan is based on the controlling items of work identified in the schedule. In the weekly progress meetings, we will discuss with the contractor the plan for performing the work by using a two-week look-ahead schedule to ensure all required equipment and materials are at the site and ready to proceed. An accurate and reliable two-week look ahead is extremely important for the CEI to adjust inspection staff based on projected work activities.

TAB 3. KEY PERSONNEL/QUALIFICATIONS OF THE PROJECT TEAM

Organizational Chart

Our staff members are experienced in delivering successful projects. We provide our clients with management staff that have extensive experience with similar projects. This experience affords them the ability to foresee and solve problems before they arise. The following Organizational Chart illustrates the team members proposed for this project. Following is a table that details our team members along with their durations of service for this contract.

Subconsultants:

- (A) Ardaman & Associates
- (F) Foundation & Geotechnical Engineering
- (H) HighSpans Engineering (DBE/MBE)
- (M) McKim and Creed
- (Q) Quest Corporation of America (DBE/WBE)

Additional resources are always available if needed. AECOM's CEI group has over 120 employees statewide, with nearly 30 in southwest Florida.

AECOM Team

We are pleased to introduce our proposed team members. Their credentials are exceptional and are ideally suited to supporting your project.

Project Leadership

As part of the AECOM team, we have **Crystal Gorman, PE**, as the **Project Principal** providing Quality Assurance/Quality Control (QA/QC) for this contract. Crystal has 19 years of engineering and construction management experience in southwest Florida on various large-scale FDOT projects – including 11 years serving as Senior Project Engineer (SPE) for AECOM and more than eight years as an FDOT employee where she served as the Interstate Construction Resident Engineer, in addition to local municipality projects. Crystal is serving as the Consultant Engineer for three ongoing Manatee Operations Continuing Services Contracts where AECOM is providing inspectors for FDOT’s in-house construction projects. Crystal has led our southwest Florida CEI team made up of 20+ CEI staff members over the past 10 years, and understands the expectations placed on inspectors and demands high-level service from her staff. She has worked in southwest Florida for many years and developed very close, trustworthy relationships with many FDOT and local municipality personnel. She is 100% committed to providing the City of North Port with exceptional service and to ensuring AECOM continues to deliver quality projects.

Our team will be led by **Sandra Boudreau, PE, PMP** as the **Senior Project Engineer (SPE)**. Sandra will continue her traditional role as team leader, facilitator, and lead administrator for issue resolution. Her previous employment as Construction Manager for Transportation Infrastructure for Sarasota County will serve the City of North Port well. In addition to standard construction project management, Sandra became involved in property acquisitions and public relations for County projects. During her employment with Sarasota County, she participated directly with the Real Property Department to acquire Fee Simple, Drainage, Slope, Sidewalk, and Temporary Construction Easements. Her work included facilitation of survey to draft parcel sketches and descriptions, coordination with attorneys to describe reason for the needs in event of eminent domain pursuit, door-to-door discussions with property owners to review the

impacts and what necessitates the need to alleviate any hesitation on obtaining the easements. As SPE, she will be in constant communication with the City PM and contractor regarding daily project activities. Sandra will be intimately involved with all issues related to public relations/time/budget, will lead any official communication with the City and major stakeholders, and will fulfil the requirements set forth in FDOT’s Construction Project Administration Manual (CPAM) for the SPE.

Our **Project Administrator (PA)** **Floyd Culligan** has nearly 30 years of experience in CEI for transportation-related facilities, including roadways and bridges, and is a resident of North Port. He has a substantial understanding of asphalt paving and final estimates and has successfully handled several major projects in his career as a PA, Assistant PA, Senior Inspector, and Roadway Inspector.

Floyd will lead all field staff in determining the daily inspector responsibilities and who will be overseeing which work activities. He will supervise the materials testing and certification program for the entire project and will be responsible for the project’s pay item tracking with the Contract Support Specialist’s (CSS) assistance. Floyd will be the first line of communication for project issues, and will be responsible for all notifications to the City and other stakeholders. He will be in constant communication with our SPE. Floyd will be involved in all issues related to time/budget and will provide guidance and oversight to the team and assist our SPE with the CEI QA Program. Floyd will be the official communication point with the City and contractor PMs and will fulfill all the requirements of a PA per CPAM.

Project Support Staff

To support our AECOM Project Leadership and provide the “behind the scenes” administrative support to our project management, inspectors and to the City of North Port, we have dedicated staff who can assist with the day-to-day minutiae to keep the project moving forward. We understand that it requires a “team” to successfully administer this type of contract – no one individual can handle it alone.

Our **Contract Support Specialist (CSS)** **Kasha Pitera, PE** is a North Port resident with over 10 years of administrative and managerial experience. She is currently serving as the CSS on a \$53M FDOT project located in Sarasota County, alongside Floyd. She is well versed in construction terminology, project documentation, and will be responsible for

maintaining accurate compliance files and assisting the CEI and contractor throughout the duration of the project.

Project Inspectors

The inspectors assigned to this contract will perform highly complex technical assignments in the field including calculating and checking engineering computations, inspecting construction work, and conducting field testing/sampling. Our inspectors are highly skilled in roadway construction, drainage construction, signing and pavement markings, maintenance of traffic, widening work, bridge construction and guardrail inspections. Their responsibilities will include site inspections along with verification sampling and testing to ensure compliance with contract documents. Additional responsibilities will include recording daily construction activities, temporary traffic control inspection, Stormwater Pollution Prevention inspection, and coordination of CEI construction activities such as earthwork, asphalt, and concrete testing, when applicable.

Our **Lead Senior Inspector Dominick Walker** has over 10 years of construction experience. His vast knowledge in construction inspections, construction materials testing, and geotechnical investigations related to major roadway construction and maintenance makes him a valued team member.

Our **Senior Roadway/Utility Inspector Ian Anderson** has nine years of experience working on various major roadway projects. He is a well versed, highly motivated individual with vast experience in all aspects of road and bridge construction.

Our **Senior Bridge/Structures Inspector Derek Smith** has 26 years of construction experience. Derek previously served as the Senior Inspector on the Biscayne Drive and US 41 Intersection Improvements for the City of North Port.

Rounding out the team of **Inspectors are Zach Wilson, Austin Levar and Josh Gorniak**. Our Inspectors are qualified in a wide variety of construction categories and the City of North Port can be assured all construction operations are covered by seasoned and knowledgeable personnel.

Subconsultants

Ardaman & Associates'

Sarasota office was founded in 1960 and

has continuously served Florida's west coast since inception. Ardaman's accomplished team has served as the consulting materials and geotechnical engineers on more than 20,000 local projects. Sarasota's engineers are supported by a significant staff of local technicians who are highly trained and properly certified in their respective work areas. This office has provided materials testing services to FDOT for many years, and their laboratory facilities meet stringent FDOT requirements. All testing personnel and equipment are in compliance with ASTM and ACI standards, and their laboratory is inspected and certified annually by the Construction Materials Engineering Council (CMEC).

Foundation & Geotechnical Engineering, LLC (FGE) is an

innovative company specializing in deep foundation design and testing,

capacity enhancement, rehabilitation/remediation and quality assurance/verification testing. With 12 staff members, including seven engineers and three technicians, FGE employs personnel to perform dynamic testing (PDA & EDC), pile integrity testing (PIT), cross hole sonic logging (CSL), thermal integrity profiling (TIP), vibration monitoring, CTQP inspection, condition surveys and related subsequent analyses. Their engineers are trained and fluent in collecting field data, data reduction and performing analysis for development of driving criteria. All engineers have studied the Foundation QA and PDCA PDA educational modules and three have received master level scores on the PDCA test. Their CTQP-certified inspectors perform geotechnical duties associated with drilled shafts, driven pile and auger cast pile installations and are trained under the supervision of geotechnical specialists. Beyond the requirements of geotechnical testing certification, their staff is highly trained and recognized as industry leaders.

FGE has a superior knowledge of the project scope and potential challenges due to their experience on similar projects in the vicinity. This knowledge provides an understanding of the variable subsurface conditions present in the region which can result in project delays, overruns, and possible foundation issues. Their work on I-75 and North Jones Loop Interchange proved challenging when granular soil provided low resistance underlain by limestone. Pile

splices were required for test piles and set checks were performed on production piles to verify bearing capacity. In Cape Coral on Burnt Store Road, they proved that set checks could be utilized to save pile lengths and speed up project deadlines. The pile foundations encountered fat clay soils which greatly slowed pile installation rates due to high rebound and blow count without achieving NBR. The piles were subsequently set checked and dynamic testing indicated NBR was achieved. In addition, this allowed pile lengths to be shortened by approximately 25%. The Charlotte Harbor Boardwalk in Port Charlotte was founded on 14-inch prestressed concrete piles driven into poorly graded sand. NBR was achieved at a shallow depth and our team performed set checks to determine the potential effects of relaxation. Ultimately, the piles were driven deeper to a more competent soil layer as relaxation was identified. **Without many years of experience in the project area and throughout Florida, the potential for poor quality or inefficient foundation construction is possible. FGE has this experience.**

The Price Boulevard widening will be founded on fine sands underlain by limestone at a depth of 55 feet. Pile driving will encounter high driving stresses at the pile tip and there will be the potential for integrity issues. This project utilizes test piles and driving criteria for production piles. FGE will ensure the driving criteria outlines driving requirements to protect piles and achieve the required NBR with confidence.

Joining our team is **HighSpans Engineering, Inc., a certified DBE/MBE**, a Fort Myers based engineering firm specializing

in construction engineering inspection and bridge design as well as providing materials lab testing. HighSpans staff is experienced in all aspects of CEI services including contract administration, claim avoidance, final estimates, bridge inspection, roadway inspection, asphalt plant inspection, resurfacing, utilities, MOT, ITS, environmental compliance, EEO/OJT reporting and has extensive experience on Design-Build and FHWA funded projects. They are prequalified by the FDOT in CEI Work Groups 10.1, 10.3, 10.4, and 10.5.1. HighSpans will be providing Asphalt Plant Inspection.

McKim & Creed, Inc. is one of the largest, most technically advanced full-service geomatics firms in the Southeast. Ranked first by ENR Southeast, they apply the power of geomatics solutions to benefit our clients. As the industry evolves, McKim & Creed has maintained a commitment to the advancement of the industry by providing cutting-edge technology and cost-effective data collection. Their team provides airborne and mobile LiDAR/scanning, unmanned aerial systems, subsurface utility engineering and hydrographic and conventional surveying services for the energy, transportation, federal, land development, water and building markets. City of North Port projects have included: Miscellaneous SCADA Services, Development of Technical Specifications, North Port Northwest Booster Pump Station, and Riverbank Filtration and RO WTP.

Founded in 1995, **Quest Corporation of America, Inc. (Quest)** is a DBE and woman-owned community engagement firm with a highly respected reputation for serving public-sector clients throughout Florida and nationally. Their firm provides full-service communications and public outreach services, including an award-winning creative design and innovative technologies team. Quest has spearheaded public involvement for hundreds of projects throughout Florida, including numerous communications and community outreach, multimodal and corridor planning, design, and construction projects in southwest Florida and throughout Sarasota County.

Quest's public engagement strategies include stakeholder engagement, advisory groups, community presentations, virtual and in-person public meetings and documentation, intergovernmental coordination, media relations, social media and digital marketing, videography including drone/aerial footage and animation. Their in-house creative team develops project logos and branding, newsletters, door hangers, websites, and other public-facing resources to engage citizens in plan development. With nearly 90 associates, Quest offers unmatched depth and breadth in serving municipal communications needs. Through their extensive work in the area, Quest has developed solid community relationships throughout the Sarasota County region and its cities to elevate the public engagement and outreach for this project.

(3) BRIEF DESCRIPTION AND SPECIFIC ROLE <input checked="" type="checkbox"/> check if project performed with current firm Inspector - This \$42M, 3.5-mile project widens the existing West Pipkin Road from two to four lanes. The widened roadway includes a center median, four 11-foot lanes and a six-foot bike lane in each direction, curb and gutter, and sidewalks. The full-depth construction consists of a flexible pavement design with stabilized subgrade, limerock base, and asphalt pavement. Other project elements include significant utility adjustments; extensive drainage and pond construction; earthwork which includes subsoil excavation; a variety of structures such as temporary sheet pile walls, gravity walls, and box culverts; pedestrian railing; signing and pavement markings; roadway lighting; and signalization. Responsibilities include verification testing of earthwork operations. County Reference: Doug Gable, PE, Project Manager; (863) 535-2285		
b. 44th Avenue Extension Phase 4 from Lockwood Ridge to Creekwood Blvd., Manatee County, FL	2023	2023
(3) BRIEF DESCRIPTION AND SPECIFIC ROLE <input type="checkbox"/> check if project performed with current firm Inspector - Provided project inspection and testing services on this \$68M bridge and roadway improvement project over the Braden River in Bradenton, FL. The project consisted of 3.27 miles of four lane roadway reconstruction, a new 1,478 LF bridge, installation of 12-inch reclaimed water and 36-inch water main and 12-inch sanitary sewer lines, utility coordination and relocations, 18- to 36-inch drainage pipe, erosion control, curb and gutter, gravity walls, traffic separators, sidewalk, custom-made drainage structures, paving, striping, signage and sod. Reference: John Dunn, Engineering Office Manager; (941) 915-1411		
c. Construction Materials Testing Technician-Level 2, Terracon Consultants, Sarasota, FL	2023	2023
(3) BRIEF DESCRIPTION AND SPECIFIC ROLE <input type="checkbox"/> check if project performed with current firm Construction Materials Testing Technician. Level 2 - Performed material testing and verification for placement of storm and utility pipe in compliance with FDOT and County standards to achieve an optimal level for compaction on weight bearing soils. Sampled various types of concrete in accordance with American Concrete Institute (ACI) methods to obtain proper water cement ratios, air percentage, slump, and create concrete cylinders for compressive strength testing. Reference: John Dunn, Engineering Office Manager; (941) 915-1411

12. NAME Michael Eggleston	13. ROLE IN THIS CONTRACT Materials Lab Testing	14. YEARS EXPERIENCE	
		a. TOTAL 21	b. WITH CURRENT FIRM 21

15. FIRM NAME AND LOCATION (City and State) **Ardaman & Associates, Inc., Sarasota, Florida**

16. EDUCATION BS, Environmental Science, University of South Florida	17. CURRENT PROFESSIONAL REGISTRATION
--	---------------------------------------

18. OTHER PROFESSIONAL QUALIFICATIONS

Michael has worked on numerous commercial and residential development projects, including roadway and utility infrastructure. He has extensive field sampling knowledge and expertise associated with environmental site assessments, audits, and monitoring activities. Michael is responsible for managing materials testing operations and QC/QA activities, as well as being the local branch Radiation Safety Officer. He supervises field technicians, coordinates scheduling, and reviews materials testing reports before issuance to clients. Michael regularly attends project pre-construction meetings and monthly progress meetings for public entity clients. He also provides support services for Phase I & II environmental audits and contamination assessments, primarily related to data collection and compilation. He is proficient with FDEP Standard Operating Procedures for Field Activities as well as NPDES compliance associated with stormwater management.

19. RELEVANT PROJECTS

	(1) TITLE AND LOCATION (City and State)	(2) YEAR COMPLETED	
		PROFESSIONAL SERVICES	CONSTRUCTION (If applicable)
a.	Sarasota County Resurfacing FY 2019-2022, Sarasota County, FL	Ongoing	
	(3) BRIEF DESCRIPTION AND SPECIFIC ROLE	<input checked="" type="checkbox"/> check if project performed with current firm	
	Supervised field activities and prepared reports for multiple years of the Sarasota County Resurfacing program. These projects include the resurfacing of select roadways in the County, together with sidewalk and curb replacements.		
b.	Prospect and Whitfield Intersection Improvements, Manatee County, FL	2023	2023
	(3) BRIEF DESCRIPTION AND SPECIFIC ROLE	<input checked="" type="checkbox"/> check if project performed with current firm	
	Ardaman provided Construction Materials Testing for the proposed intersection improvements which consisted of new signal poles founded on drilled shaft foundations and roadway widening together with drainage improvements. Supervised field technicians and prepared testing reports. Asphalt monitoring services were also provided and supervised.		
c.	Venice Municipal Airport, Venice, Sarasota County, FL	2022	
	(3) BRIEF DESCRIPTION AND SPECIFIC ROLE	<input checked="" type="checkbox"/> check if project performed with current firm	
	This project involved full-depth reclamation for select existing runway and taxiway areas. Our firm was responsible for field and laboratory Contractor Quality Control testing of the reclaimed base materials. Assisted with field activities and coordinated with the Construction Engineering Inspection firm and their materials testing laboratory.		
d.	Ringling Boulevard Roundabouts, Sarasota, Sarasota County, FL	2014	
	(3) BRIEF DESCRIPTION AND SPECIFIC ROLE	<input checked="" type="checkbox"/> check if project performed with current firm	
	These projects involved the redevelopment of two existing intersections. These were federally funded FDOT Local Agency Program projects where we performed verification testing for the City of Sarasota. Supervised field technicians and prepared testing reports.

City of North Port	Ben Newman, PE Project Manager	941-240-8320 bnewman@cityofnorthport.com	

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

The City of North Port was awarded a Federal Highway Administration (FHWA) Transportation Alternatives Program Grant in the amount of \$427,258 to install lighting along the US 41 pedestrian park walkways, from Biscayne Drive to North Port Boulevard including two pedestrian rest areas, and landscaping. Work included installation of decorative light structures on precast foundations, conduit installation, concrete sidewalks, benches and landscaping throughout the project site.

AECOM provided project administration, engineering and inspection, and EEO compliance services for this LAP contract. AECOM was responsible for all construction and administrative aspects which include review of contract documents, holding meetings, preparation of progress pay estimates, change orders and the final estimate package, review and approving shop drawings, updating submittal logs, preparing and sign and sealing the final as-builts, monitoring field activities and reviewing daily reports of construction.

Relevance to this Contract:

- City of North Port Project
- Construction Engineering and Inspection
- Coordination with FDOT and Utilities
- Pedestrian Facility

Date of Completion: 4/2016
Cost (fee): \$63,938
Construction Cost: \$444,943
Key Personnel: Crystal Gorman
Construction Duration: 11/2015 - 4/2016
Total Value of Approved Change Orders: \$1,275

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

The project consisted of construction of a 12-foot wide multi-use trail on the north side of Van Buren Parkway from Burnt Store Road to El Dorado Boulevard; on the east side of El Dorado Boulevard from Van Buren Parkway to Kismet Parkway; and on the north side of Kismet Parkway from El Dorado Boulevard to Nelson Road; approximately 3.5 miles. Other components included, but not limited to, a new pedestrian bridge (prefabricated steel, clear span over Zanzibar Canal), roadway widening, milling and resurfacing, driveway reconstruction, driveway widening on improved lots, drainage improvements/curb and gutter, utility sleeves and sanitary service laterals under the trail, utility relocations, signing and pavement, permitting, and environmental mitigation. This is a FDOT grant program through the SUN Trail program. AECOM staff were essential in obtaining ROE agreements and providing up to date information to the many homeowners effected by the construction activity.

Relevance to this Contract:

- Construction Engineering and Inspection
- Pedestrian Facilities
- Coordination with Homeowners
- Coordination with Utilities

Date of Completion: 3/2023

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

AECOM is currently serving as the Prime CEI on the I-75 at SR 72 Interchange Improvements project in Sarasota County for FDOT District One. This \$53 million interchange improvements project consists of improvements for the interchange at SR 93 (I-75) and SR 72 (Clark Road) in Sarasota County in the form of a Diverging Diamond Interchange (DDI). The proposed improvements for SR 93 include widening to provide auxiliary lanes for each on and off ramp south of the SR 72 interchange, widening for a 12-foot auxiliary lane north of the SR 72 interchange in each direction, milling and resurfacing the existing mainline pavement and reconstruction of all of the ramps at the SR 72 interchange. The proposed improvements along SR 72 include providing an eight-lane divided DDI with 11-foot travel lanes and a seven-foot-wide buffered bike lane in each direction of travel. Additional improvements include noise walls, signing and marking, lighting, signalization, ITS and utility work items.

Relevance to this Contract:

- Construction Engineering and Inspection
- Roadway Improvements Project
- Coordination with FDOT and Utilities
- Proposed Staff for Price Boulevard

Date of Completion: Scheduled completion 4/2024

Cost (fee): \$4,900,000

Construction Cost: \$55,300,000

Key Personnel: Floyd Culligan, Kasha Pitera, Crystal Gorman, Ian Anderson, Zach Wilson

Construction Duration: 10/2021 - Present

Total Value of Approved Change Orders: \$0

CEI services included:

- Conducted Preconstruction Conference
- Coordinated Utility Relocation efforts to avoid project delays
- Coordinated Shop Drawing submittals with EOR/FDOT for review and approval
- Reviewed CPM Baseline Schedule and monthly updates for acceptance
- Reviewed Contractor's Quality Control Plan for acceptance
- Observed and documented daily work efforts
- Material sampling and testing and monitoring for conformance to contract
- Monitored Environmental Permit compliance
- Monitored Maintenance of Traffic devices and inspection reports for conformance
- Administered unforeseen utility conflicts/private property impacts for timely resolution of issues
- Provided project status updates to traveling public
- Prepared monthly estimates and tracked pay items
- Administered additional work by Supplemental Agreement or Work Order

a. PROJECT OWNER City of North Port	b. POINT OF CONTACT NAMES Ben Newman, PE Public Works Director	c. POINT OF CONTACT INFORMATION 941-240-8320 bnewman@cityofnorthport.com

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

The City of North Port received LAP federal funding through the Sarasota County MPO and FDOT to construct improvements to the US 41/Biscayne Drive and Price Boulevard/Biscayne Drive intersections. Project involved improvement of two intersections in the City of North Port.

One project constructed a dedicated right turn lane for southbound Biscayne Drive to westbound US 41 and replaced the signals. The other project constructed a dedicated right turn lane for westbound Price Boulevard to northbound Biscayne Drive. Additional improvements at the intersections included milling and resurfacing, pedestrian facilities, drainage, signalization, and signing and pavement markings.

AECOM provided project administration, engineering and inspection, and EEO compliance services for the intersection improvement LAP contract. One of the unique aspects of this contract included the separation of both intersection projects with two different financial tracking numbers. Coordination was key between the Contractor, the City of North Port, and FDOT. There were also challenges with the drill shafts for the mast arm signals being constructed in a very tight and congested utility area - both underground and overhead. Therefore, utility coordination was an important part of the CEI services provided.

Relevance to this Contract:

- City of North Port Project
- Roadway Improvements Project
- Construction Engineering and Inspection
- Coordination with FDOT and Utilities
- Managed by Crystal Gorman

Date of Completion: 2/2015
Cost (fee): \$84,687

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

The improvements under this contract consist of adding lanes and reconstruction, milling and resurfacing, widening, base work, drainage improvement, box culverts, curb and gutter, concrete boarding pads, asphalt base curb pads, sidewalks, pedestrian/bicycle railing, signing and pavement marking, signalization, lighting and utility work by highway contractor on State Road 45A (Venice Connector) from Center Road northerly 1.187 miles up to Gulf Coast Boulevard in Sarasota County.

This project was located along a highly commercialized urban corridor in Venice. Multiple business were impacted during the reconstruction of driveways and sidewalks. AECOM staff were critical in ensuring businesses maintained uninterrupted access and we worked closely with the contractor developing schedules that would not only have the least amount of impacts to the businesses but also keep the contractor on schedule.

AECOM staff and the contractor worked closely with Sarasota County Area Transit to maintain bus service during construction activities, coordinating bus stop relocations and reconstruction of new bus stop pads.

Relevance to this Contract:

- Roadway Improvements Project
- Construction Engineering and Inspection
- Coordination with FDOT and Utilities

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

This state grant-funded construction project consisted of over 3.5 miles of new two-lane divided roadway between Laurel Road and SR 681. The project included a bridge over Fox Creek utilizing prestressed concrete piles. The project also included maintenance of traffic, erosion control, earthwork with two pond liners, storm drainage, subgrade, base, asphalt, curb and gutter, multi-use path construction, landscaping, signing, pavement markings, and two new signalized intersections at SR 681 and Laurel Road.

AECOM provided full CEI on this contract, including contract administration, field inspection and testing, asphalt plant inspection, utility coordination, environmental compliance, and public information.

21. TITLE AND LOCATION (City and State)	22. YEAR COMPLETED	
SR 93/I-75 Widening from Sumter Boulevard to River Road Sarasota County, Florida	PROFESSIONAL SERVICES 2017	CONSTRUCTION (if appl.) 2017

23. PROJECT OWNER'S INFORMATION

a. PROJECT OWNER Florida Department of Transportation, District One	b. POINT OF CONTACT NAMES Marléna Gore Project Manager	c. POINT OF CONTACT INFORMATION 863-272-5008 marlena@gore@dot.state.fl.us
--	--	---

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

AECOM provided project administration and CEI services on this interstate widening project. The project included roadway widening from four to six lanes, milling and resurfacing, cross slope correction, bridge widening to eight lanes, median and linear pond construction with associated drainage, box culvert extensions, ITS adjustments, lighting, cable barrier and guardrail, signing and pavement markings, and utility coordination.

Relevance to this Contract:

- Construction Engineering and Inspection
- Roadway Improvements Project
- Coordination with FDOT and Utilities
- Managed by Crystal Gorman

Date of Completion: 2/2017
Cost (fee): \$3,130,000
Construction Cost: \$33,600,000
Key Personnel: Crystal Gorman, Floyd Culligan, Derek Smith
Construction Duration: 7/2013 - 2/2017
Total Value of Approved Change Orders: \$1,126,320 (large amount mostly due to thermoplastic being added for seven miles of interstate and unforeseen shoulder reconstruction needed)

25. FIRMS FROM SECTION C INVOLVED WITH THIS PROJECT

(1) FIRM NAME	(2) FIRM LOCATION (City and State)	(3) ROLE
a. AECOM	Tampa and Venice, FL	Prime, CEI
b. HighSpans Engineering	Fort Myers, FL	Roadway Inspection
c. Foundation & Geotechnical Engineering	Plant City, FL	Geotechnical

F. EXAMPLE PROJECTS WHICH BEST ILLUSTRATE TEAM'S QUALIFICATIONS FOR THIS CONTRACT
 (Complete one Section F for each project.)

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

AECOM provided project administration and CEI services on this interchange improvement project. The improvements under this contract consisted of milling and resurfacing, widening, bridge construction, MSE walls, box culvert extension, storm drainage, curb and gutter, sidewalk, guardrail, signalization, ITS, high mast and conventional lighting, signing, pavement markings and utility relocation work. ***This project received the FTBA Best in Construction (Interchange) Award for 2019.***

Relevance to this Contract:

- Local Project
- Construction Engineering and Inspection
- Roadway Improvements Project
- Drainage Improvements
- Milling and Resurfacing

Date of Completion: 4/2019
Cost (fee): \$2,900,000
Construction Cost: \$41,000,000
Key Personnel: Floyd Culligan, Ian Anderson
Construction Duration: 4/2017 - 4/2019
Total Value of Approved Change Orders: \$1,900,000

25. FIRMS FROM SECTION C INVOLVED WITH THIS PROJECT

	(1) FIRM NAME	(2) FIRM LOCATION (City and State)	(3) ROLE

--	--	--

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (Include scope, size, and cost)

The existing Legacy Trail was being extended by 12 miles from Culverhouse Nature Park to Fruitville Road in Sarasota on an existing railroad corridor and extended the trail from Forbes Trail across Deer Prairie Creek to West Price Boulevard in North Port. Project activities included earthwork, drainage, utility installation, County ITS fiber, asphalt paving, trailhead building construction, landscaping, and five prefabricated steel truss bridges with cast-in-place concrete riding surfaces. During construction, contamination was encountered which was remediated by a specialty contractor. Work also included parks site construction of three new trailheads which contained playground equipment, restroom buildings, parking lots, and community center. The construction of this trail directly impacted numerous residences which necessitated direct interaction by the project team to understand the residents' concerns, discuss options to mitigate the issue with residents and client to come to a mutually acceptable resolution.

Relevance to this Contract:

- Construction Engineering and Inspection
- Pedestrian Facility
- Coordination with FDOT, Local Agency and Utilities

Date of Completion: 10/2022
Cost (fee): \$1,270,000
Construction Cost: \$36,500,000
Key Personnel: Crystal Gorman, Sandra Boudreau, Dominick Walker, Josh Gorniak
Construction Duration: 7/2020 - 10/2022
Total Value of Approved Change Orders: \$0

25. FIRMS FROM SECTION C INVOLVED WITH THIS PROJECT

5	US 41 at Biscayne Drive and Price Boulevard at Biscayne Drive Intersection Improvement (LAP)	10	Legacy Trail Extension

TAB 5. MANAGEMENT APPROACH/PROJECT CONTROL

Managing Similar Completed Projects/Adherence to Time and Budget Constraints on Projects Completed in the Last 10 Years

We welcome you to contact our recent client references, as provided in this proposal, to receive feedback on our past performance. We are confident you will see the level of experience we have with previous projects similar in size, type and complexity in our resumes. AECOM takes pride in our proactive approach to contract management. Since our team has worked together on current and previous contracts, they understand each other's expectations and responsibilities, which is invaluable in successfully completing a project. Our relevant and similar project experience is described in detail throughout this proposal. Members of this team have completed, or are completing, the following projects on time and within or under budget.

- US 41 Pedestrian Walkway Lighting LAP, City of North Port, FL
- Honore Avenue/Pinebrook Road Extension, Phase VII, Sarasota County, FL
- US 41 at Biscayne Drive and Price Boulevard Intersection Improvements LAP, City of North Port, FL
- Legacy Trail Extension, Sarasota, FL
- I-75 (SR 93) Widening from Sumter Boulevard to River Road, Sarasota County, FL
- SUN Trail Phase 1, City of Cape Coral, FL
- I-75 (SR 93) at Clark Road (SR 72), Sarasota, FL
- North Port Bike Lanes Widening LAP, City of North Port, FL
- US 41 Venice Bypass, Venice, FL
- I-75 (SR 93) at SR 64 Interchange Improvements, Manatee County, FL

Learning through similar experience, our approach emphasizes communication to make contract components seamless. By providing you with a local team and a proactive Senior Project Engineer and Project Administrator, communication can remain fluid, whether in person, via email, or by phone. The primary technical job for our team is to enforce the specifications. Further, our experienced Senior Inspectors bring the wisdom from working on many FDOT projects as well as the skills to “build the job

mentally before the contractor builds it” to avoid issues and delays.

While the adherence to plans and specifications is paramount on construction projects, Price Boulevard will also require finesse in coordination of the construction with all impacted residents and the general public. From the proposed use of subconsultant Quest as Public Outreach Specialists, to the Inspectors, Project Administrator, and Senior Project Engineer, all project staff will be a part of the solution to the public's need for consistent updated information on this project.

The AECOM team is committed to thorough and continuous communication with our project partners, including the City and the contractor. Communication is the key to a successful project and begins at contract award. We will contact the selected contractor to introduce our team and follow up the conversation by sending a letter or email identifying submittals that need to be received prior to beginning construction. Every member of our team will foster a partnering relationship with the contractor. If we can keep the contractor on schedule, while adhering to the contract and our high-quality standards, frivolous claims can be avoided. We believe in face-to-face communication and an open dialogue. From the Kickoff Meeting to the Closeout Meeting, our team will provide high level, reliable communication.

Most of AECOM's recent projects were delivered to clients on time or ahead of schedule, and on or under budget. Occasionally, change orders are unavoidable due to client-requested changes, or unforeseen conditions. However, AECOM works diligently, starting prior to construction, to identify any potential changes and mitigates them as much as possible. Our team consistently ensures all documentation is complete and accurate when turned over to the owner and as-builts are digitally updated throughout construction and signed and sealed by the Senior Project Engineer. The final estimates are checked by multiple levels of reviewers to ensure the contractor was accurately paid for work items completed. All records are checked against AECOM's extensive Quality Assurance review procedures. The attention given to our QA process ensures our deliverables meet a high standard of technical quality, and that the potential for errors during construction are minimized.

Managing Similar Projects with Public Concerns

Our proposed staff has significant experience with property acquisitions and public coordination. Our proposed **Senior Project Engineer, Sandra Boudreau, PE, PMP**, has been involved with multiple projects requiring property acquisitions, some of which have gone to condemnation. She is well versed in working with design engineers and attorneys to review needs based on potential alternate construction methodologies and in negotiating with property owners to obtain all needed right-of-way or easements.

Sandra has also completed projects that had similar concerns from residents and held direct communications with them to fully understand their concerns, work with them on a reasonable solution and direct contractors to perform as agreed with the resident. As the former Sarasota County Construction Manager for Transportation CIPs, Sandra has the experience, depth of knowledge, and skillset to assist the City of North Port on the successful completion of this challenging project.

Our team member, **Quest Corporation of America**, is rooted in southwest Florida and understands Sarasota County's diverse and growing communities and the importance of this project. Quest will develop a community outreach plan that ensures awareness of the opportunity for and encourages residents, community groups, and stakeholders to engage in the outreach and awareness process. Through our comprehensive outreach – including to traditionally underserved populations - Quest will use traditional, grassroots, and innovative strategies to garner crucial community and stakeholder awareness.

Quest understands that a robust, solid public outreach program is essential to the success of any project. Early and sustained stakeholder engagement will foster creative, dynamic, and energetic participation by primary and secondary stakeholders. For this project, the approach will begin by establishing clear objectives to ensure awareness moves beyond education and into active dialogue. Concerns will be monitored, and a two-way line of communication established so members of the North Port community are confident information is current and concerns heard, documented, and responded to. At all times, the process will be transparent

with multiple outreach elements to ensure access to schedules and project impacts. Stakeholders, including businesses, community services, residents, and visitors as well as community leaders, will be informed through such outreach elements as project update presentations, media relations support, a project website, a social media and digital campaign, and ongoing communications to stakeholders – all in coordination with the public information officer for the City of North Port.

Quest is well positioned to conduct a broad reaching range of outreach activities to ensure the community's voices are heard, trust is established, and information is shared. Educating the community and sharing timely, accurate information is an important component of this project. Our approach will leverage Quest's in-house staff skills to create PSAs, social media campaigns and materials such as digital flyers, project schedules and maps, informational fact sheets and a project website with a comment form and e-newsletter registration.

For this project, Quest will serve as an extension of staff, coordinating all assigned public engagement activities. Quest recognizes the vital role of public outreach and will ensure all requirements are met. All public involvement documents will be provided to key project staff within the agreed-upon timeframe for quality control and review. All efforts will include complying with Title VI requirements and documentation.

Office from which the Work will be Primarily Performed

AECOM will work with the City to decide if a project specific field office in North Port is required. If one is required, AECOM will work to identify a site and obtain City approval. If no field office is required, AECOM will work from our Sarasota office. Project records will be safely maintained in this office as well as on AECOM servers, and project meetings can be held here or at City Hall. We anticipate our inspection staff will work from the project site using their mobile equipment for correspondence as they do on their current and recent projects. All our staff is equipped with smart phones, laptops with wireless Internet access, GoPro digital cameras, printers and scanners – effectively creating a mobile office in their vehicles for uninterrupted communication capabilities. All staff will report for service with their “mobile office” and required testing equipment for

the anticipated work element such as concrete, asphalt or earthwork. They will have all the inspection contract documents, including, but not limited to plans, specifications, guidelists, manuals, field books, forms, etc. AECOM utilizes a deployment checklist to ensure all staff members are fully prepared for the tasks at hand.

Workload and Techniques to Assure Project Schedules will be Met

While AECOM has managed and produced some of Florida’s largest and most complex CEI projects, we are equally proud of the important projects we have successfully completed for local communities. Our proposed staff members perform the tasks listed in the Scope of Services on a daily basis. They are professionals that know and understand how to do their job. Prior to selection of specific staff for our team, we examined the existing and projected workload of each person. Our team members have been chosen based on several factors: anticipated construction duration of this project, expected end dates of our proposed staffs’ current assignments, and anticipated schedule of this contract starting. With our plan in place, we will provide North Port with an outstanding, local CEI team with our inspection staff being ready to hit the ground running on Day One.

The key staff members included in this proposal will be completed with their current assignments prior to the commencement of this contract, so our staff will be 100% available. On our past contracts, we have proven our ability to manage our staffing in coordination with the contractor’s schedule, adjusting staff levels while mitigating or minimizing both construction and CEI change orders. We have a large pool of resources to draw from should additional resources be required. The following table shows our staff’s current workload and percent availability for this project.

AECOM considers the review of the contractor’s schedule a very important component of successful CEI administration. AECOM has the following procedures in place for schedule control.

Contractor’s Baseline Schedule Submittal

Effective use of the schedule begins with a timely baseline submittal. The AECOM team intends to work closely with the contractor as soon as possible to formulate a baseline schedule. While helping, we will be careful not to dictate means and methods or resource allocation. Our goal is to have a baseline schedule established for the project at the Preconstruction Meeting so a detailed discussion can occur for the benefit of those present.

Team Member / Role	Current Workload (%)	Current Assignment Completion	Availability for this Project
Sandra Boudreau, PE, PMP Senior Project Engineer	50%	January 2024 - Curve Safety Improvements, Hendry County December 2025 - CR 491, Citrus County	75%
Floyd Culligan Project Administrator	100%	April 2024 - I-75 at SR 72 Interchange, Sarasota	100%
Kasha Pitera, PE Contract Support Specialist	100%	April 2024 - I-75 at SR 72 Interchange, Sarasota	100%
Dominick Walker Lead Senior Inspector	100%	April 2024 - FDOT/Manatee Ops Center	100%
Ian Anderson, EI Senior Inspector	100%	April 2024 - I-75 at SR 72 Interchange, Sarasota	100%
Derek Smith Senior Bridge Inspector	100%	April 2024 - I-75 at SR 951	100%
Zachary Wilson Inspector	100%	April 2024 - I-75 at SR 72 Interchange, Sarasota	100%
Austin Levar Inspector	100%	April 2024 – West Pipken Road, Polk County	100%
Josh Gorniak Inspector	100%	April 2024 – SR 45 (US Bus 41) from 17th Street to Bayshore Road, Manatee County	100%

Upon submittal of the baseline schedule, the review will include the following, at a minimum:

- Completion date meets contract time or sooner
- Logical sequence of activities
- MOT phasing reflected in sequence
- Milestones included
- Reasonable production rates
- Adequate breakdown of activities to eliminate durations more than 30 days
- Utility relocation durations are included
- Cost loading analysis
- Contractor submittals with adequate review periods in accordance with specifications
- Narrative identifying critical path
- Not an excess of activities shown on the critical path

Project Schedule Updates

AECOM will ensure the schedule remains the focal point of the project team by discussing, in detail, the schedule status at the progress meetings. The contractor's schedule update should reflect construction progress during the previous month. In updating the schedule, the contractor may choose to modify the sequence of events and activities or alter durations. If this occurs, we will want to know why, and whether there is an effect on the overall project. If the update is accepted, the submitted schedule then becomes the basis for future "scheduled vs. actual" activity analysis.

Two-Week Look Ahead

The AECOM team will ensure the contractor's two-week work plan is based on the controlling items of work, or critical path items, as identified in the schedule. Noncritical schedule activities will be monitored closely as well. We will discuss with the contractor the plan for performing the work by using a two-week look-ahead schedule in the weekly progress meetings. We will be able to discuss openly whether the required equipment and materials are at the site for construction and ready to proceed in a timely fashion.

Project Understanding

AECOM's team is very familiar with Price Boulevard. With two key team members who are North Port residents, and with AECOM having previously served as CEI on four other City of North Port projects, we have intimate knowledge of the corridor and the surrounding neighborhood. Price Boulevard is a major thoroughfare servicing the northern

residential communities of North Port with access to I-75 via Sumter Boulevard and Toledo Blade Boulevard. It is currently a two lane undivided highway with over 200 residential homes adjoining the roadway. This project involves the widening of Price Boulevard from east of Sumter Boulevard to west of Toledo Blade Boulevard from two lanes to four lanes with a bidirectional left turn lane. Improvements to the existing stormwater system will include over five miles of new drainage pipes and more than 180 new drainage structures connecting to 12 new landscaped ponds. The existing bridge at the MacCaughy Waterway will be widened and the weirs at the Blueridge and Lagoon Waterways will be replaced. Three existing signalized intersections will be entirely reconstructed with mast arms and a new emergency traffic signal will be installed at Citizen's Parkway for Fire/EMS services. Side streets at the signalized intersections will be widened to accommodate the addition of turn lanes. New driveway aprons will be constructed and over five miles of 10' wide concrete multi-use path will provide pedestrian access along the eastbound and westbound sides of Price Boulevard. New streetlighting will be installed in addition to new landscaping, and bikes lanes will be incorporated into the final striping plan. Upgrades to the existing watermain and sanitary sewer are also included in the widening project.

Approach – Anticipated Problems and Solutions

Our Organizational Chart shown in TAB 3 (Key Personnel/Qualifications of the Project Team) clearly delineates our proposed staffing for the project. AECOM is a large firm with a strong local presence, meaning resources can be added, if required, for any reason. Being proactive and having a thorough understanding of the contract documents is how we approach all projects.

Construction of a major project in any community brings its own set of challenges. Our staff has already begun preparations for this job by reviewing the RFP, contractor Invitation to Bid documents, and available plansets. Based on these reviews and our site visit, we have noted below the biggest challenges and/or safety concerns that could potentially present costly delays to the project.

Homeowner Access. This entire project corridor is in the front yards of North Port residents, affecting their lives and daily commute for the next two years.

Of paramount consideration will be the ability to keep all stakeholders continuously updated on project progress as well as direct communications with those residents directly affected by the construction of Price Boulevard.

AECOM understands that widening Price Boulevard and the construction of the 10' multi-use path will significantly reduce the size of their front yards, a space that families have utilized for years as part of their homes. Prior to the start of construction, our team will be fully prepared to quickly respond to homeowner's project-related questions and concerns. As a multi-year project, we expect the residents will experience "construction fatigue" and addressing homeowner concerns will be AECOM's top priority. Each and every property is unique and construction easements will be required in order to harmonize the existing conditions beyond the right-of-way to the proposed new sidewalk. While road work is being constructed adjacent to their driveways, AECOM will coordinate with the residents in advance to schedule these impacts appropriately and provide alternate or temporary access, if necessary.

US Postal Service. Based on the RFP and Pre-proposal Meeting with the City, AECOM understands three locations will be established for residential mail for the duration of the project as all current residential mailboxes will be impacted. We will coordinate the construction of the three central mailbox locations, distribution of keys to the residents, and handle any questions they may have on the process of mail delivery. We will maintain contact with the United States Postal Service to assure all requirements are adhered to for their continued mail delivery.

Solid Waste. The Solid Waste Department will need safe access to trash receptacles on their scheduled pickup days. AECOM will make sure that ongoing communication with the Solid Waste Department occurs frequently and this topic will be discussed at the weekly progress meetings.

Media Relations/Social Media. Our subconsultant, Quest, will establish and continuously update a project website, as well as lead the social media campaign. By being proactive in information dissemination, the project team will attempt to alleviate residents' distress and commuters' displeasure during the construction of Price Boulevard.

Of paramount consideration will be the ability to keep all stakeholders continuously updated on project progress as well as direct communications with those residents directly affected by the construction of Price Boulevard.

Our approach to the successful completion of our projects is to identify any potential problems prior to the start of construction. Our team has, through multiple site visits and plan reviews, identified the following items of concern and look forward to assisting the City and the Engineer of Record (EOR) with providing a safe environment for the public as well as the individuals performing the work.

ISSUE: Pedestrian Safety

At AECOM, safety is our top priority. As shown in the TTCP MOT Phase 1A, a temporary pedestrian path is to be maintained through the work zone. This proposed pedestrian path will be in direct conflict with the drainage installations, utility upgrades, truck traffic at the ponds, and driveway apron construction.

Recommendation: We will work closely with the EOR to determine an alternative pedestrian pathway, preferably on the opposite side of the roadway and out of active work zones.

ISSUE: Pedestrian Crosswalks

We have identified five crosswalks within the project, meaning there is a 3,000' average between designated crosswalks. We feel this long distance will lead to pedestrians crossing the roadway outside the designated crossings.

Recommendation: We will coordinate with the EOR on the possibility of incorporating mid-block crosswalks into the permanent design in order to provide additional safe pedestrian crossings.

ISSUE: Noise

With the amount of construction occurring in such close proximity to residential homes, noise complaints are anticipated.

Recommendation: The EOR should incorporate restrictions on noise levels in the Special Provisions as well as require the use of noise dampeners

on continuously running equipment, such as the dewatering pumps. We will also work closely with the contractor and the City to identify the most effective means to control the level of noise and develop a “start and stop” schedule for weekdays and weekends. These notes should be included in the plans prior to bid.

ISSUE: Existing Structures Impacted by Vibrations

With more than 200 residential homes located along the corridor, and construction activities being performed literally in their front yards, we feel the risk of claims due to excessive vibrations is very high. Some examples include: pile driving, concrete and steel sheet pile driving, pond excavation, earthwork compaction for drainage, embankment, subgrade, base and asphalt placement.

Recommendation: We will coordinate closely with the contractor and the EOR to adhere to Specification Section 108 - Monitoring of Existing Structures. We will ensure the contractor develops a vibration monitoring plan and, if approved, will monitor the contractor’s implementation and compliance. Pre-construction documentation, with photos and videos, of all adjacent structures (including homes) will be a first priority to protect not only the contractor from frivolous third party claims, but also the residents should a valid claim be made. Another critical element of monitoring existing structures is being able to obtain Right of Entry Agreements for any structures that are privately owned.

ISSUE: Excavation

With an anticipated 79,000 CY of material being excavated within the project limits and just over 19,000 CY being incorporated into the design, we expect a significant number of trucks to be traveling throughout the project limits on a daily basis for off-site disposal of excess materials.

Recommendation: We will request the contractor submit a designated haul route for review. Our staff will research the requested route, and if approved, we will document the existing conditions via photographs and drone video. We will monitor trucking activities for compliance and all earthmoving activities to ensure compliance with City Ordinance 2016-20.

ISSUE: Nightwork

TTCP Note No. 9 states, “Night time work is prohibited.” Certain activities like flying mast arms, switching signals from strain poles to mast arms, lateral pipe crossings, water main full bore flushing and sanitary sewer connections should be performed at night due to low traffic volumes or low demand on a particular utility.

Recommendation: We will coordinate with the EOR and the contractor to determine the most effective methods to perform these operations and minimize the need for nighttime activities. When nighttime activities are required, we will seek the City’s approval first, then communicate the need and impacts to the residents at least a week ahead of scheduled construction. Additionally, we will post this information to the Project Website to ensure project residents and stakeholders are effectively notified.

ISSUE: Protection of Existing Utilities

With critical infrastructure present throughout the entire corridor, either in direct conflict or very close proximity to construction activities, identification and protection of existing utilities is essential to avoid delays. For example, the triple barrel drainage pipes that are to be installed laterally across Price Boulevard (at three separate waterways) call for temporary sheet pile installation for the deep drainage installation. There are watermains, forcemains and buried Fiber Optic Cable and buried telephone at each location. These utilities are at extreme risk of damage and/or service interruptions.

Recommendation: We will coordinate closely with the EOR and the contractor to identify the most responsible approach to protecting the existing utility infrastructure and preventing service interruptions. We will request the contractor to submit a plan for the protection of existing utilities and, if approved, monitor the activities for compliance.

ISSUE: Material Acquisition

Lead time for the acquisition of certain construction materials has increased significantly which in turn has led to lengthy delays and additional costs to the owners.

Recommendation: Upon contractor selection, we will schedule a meeting to discuss the importance of executing their Subcontractor Agreements and the submitting of any shop drawings for review

and approval so that appropriate materials can be ordered in a timely manner.

ISSUE: Environmental

With the proposed large scale earthwork operations at the Blueridge, MacCaughy, Lagoon and Creighton Waterways, the potential for turbid water discharge is very high.

Recommendation: We will ensure the contractor is following the Stormwater Pollution and Prevention Plan detailed in the plans and any special conditions called for in the required permits. We will also monitor the contractor's dewatering activities and erosion control efforts for compliance with Best Management Practices (BMP) and diligently monitor the waterways at all times for any signs of turbidity. Further, AECOM will ensure the contractor takes precautionary measures to prevent discharge of pollutants offsite during earthwork, storm drainage, and milling and paving operations. Any exposed earth will be stabilized with performance turf due to its characteristic of faster establishment when compared to hydroseed. CEI staff will ensure that any sod placed has been cut less than 48 hours prior to placement and will ensure the contractor monitors the turf for the presence of pest plants or noxious weeds. All AECOM inspectors are FDEP/ NPDES Stormwater Certified.

ISSUE: Environmental

The Price Boulevard project is identified as a Gopher Tortoise Habitat Area. Gopher Tortoises are listed on the Florida Fish and Wildlife Commission's website as a threatened species.

Recommendation: AECOM will ensure the contractor is in compliance with the Florida Endangered and Threatened Species Rule. Our team is very experienced with projects that have the potential to encounter endangered/threatened species on or very near the project and we will develop a protocol to follow in the event there is an encounter. Additionally, we look forward to working with the recently adopted Natural Resources Department to facilitate any needed protection requirements and/or relocations. Obtaining Gopher Tortoise Relocation Permits can be a lengthy and expensive process. It is recommended that if a survey is needed, it is completed well in advance of construction starting. It will also be important to identify in the contract documents who will be responsible for any such permitting efforts and fees.

ISSUE: Overhead Powerline Conflicts

Overhead powerlines running along the north side of the road appear to be in conflict with the drilled shaft installations, pedestrian bridge removals and weir construction.

Recommendation: We will coordinate with the contractor to identify any possible conflicts and establish contact with the utility owner early in the project to prevent costly delays. Special equipment may be required to construct these work items to avoid being within the minimum OSHA distances.

ISSUE: Hurricane Season

During the period of June 1 to November 30 – Hurricane Season, if construction activities are impacting travel lanes and a Hurricane Warning is issued, the contractor may not have enough time to make those lanes available for use.

Recommendation: With the adjacent Toledo Blade Boulevard being used as an Evacuation Route, it is imperative for public safety that the contractor have an approved Hurricane Readiness Plan. This plan should cover action plans 72-, 48-, and 24-hours pre-landfall of the storm. In addition, AECOM will be mindful during all construction activities to the potential to need impacted lanes to be re-opened prior to contract work being completed.

Maintenance of Traffic. In conjunction with the issues described above, maintenance of traffic and safety will be crucial for drivers, residents, bicyclists, and pedestrians alike. We will keep the City and residents informed of all scheduled lane closures and other potential impacts to the public during construction. Pavement elevation grade differences, clear zone requirements, MOT device placement, etc. are aspects the CEI team will be diligent about throughout construction. AECOM has served in a design and construction capacity on numerous roadway projects throughout Florida, and we recognize the sensitivity of not encroaching beyond the right-of-way or increasing impacts to residents. AECOM inspection staff will ensure there are no drop offs or above-ground hazards in the clear zone prior to the contractor leaving the site and the site becomes inactive.

Signing and Pavement Markings. Signing and pavement markings are essential to providing a safe and navigable roadway for the traveling public. AECOM will hold a Pre-activity Meeting with the contractor prior to pavement markings being

installed to ensure the contract plans and FDOT Standards are understood and being utilized.

Project Approach

AECOM has outlined below our anticipated project tasks and deliverables with regard to contract administration and inspection of this project. A strict adherence to these steps has enabled our CEI teams to complete all past projects with outstanding results.

Pre-Construction Activities

- Create Project Website to include overall project description and schedule, weekly progress report, two week look ahead schedule, progress photos/videos, inquiry link, and Frequently Asked Questions at a minimum
- CEI Kickoff Meeting with City and EOR
- Establish communication with the City of North Port PIO
- Establish communication with the City's Public Works and Legal Departments
- Develop electronic file system and establish document control guidelines
- Establish communication with contractor
- Review remaining Temporary Construction Easements (TCE) needs and reevaluate needs vs. alternative construction techniques to potentially reduce or eliminate needs
- Assist with obtainment of Right-of-Way agreements - TCEs
- Pre-Construction Meeting with contractor and all stakeholders
- Perform pre-construction field surveys
- Obtain pre-construction photo documentation/ video
- Submit CEI Quality Management Plan to City and request approval of proposed staffing
- Review project requirements with inspection staff (critical requirement guide lists, specifications, plans, contract, etc.)
- Setup site source records and field books
- Set up correspondence distribution lists
- Review contractor's baseline schedule, Quality Control Plan, and other pre-construction submittals/shop drawings

Construction Activities

- Pre-Activity Meetings for major work items and construction phases
- Maintenance and weekly updates to Project Website

- Weekly progress meetings
- Monthly CEI status reporting/invoicing
- Daily work reports/weekly engineer's summaries
- Homeowner/Resident outreach, private property protection
- Regular coordination and communication with the City
- Construction Inspection and Verification Testing – paving, concrete, soils and aggregate, earthwork, nuclear gauge density testing, SWPPP, striping, etc.
- Materials sample entries and approvals
- Weekly review of MOT and contractor submitted NPDES reports
- Regular photos and video documentation
- Schedule update reviews, claims avoidance, dispute resolution
- Safety monitoring and reporting
- Negotiate contract changes
- Shop drawing reviews
- Quality Assurance Reviews
- Progress payments (quantities tracking, stockpiled materials, subcontractor payment monitoring)
- Plan revisions/As-Builts
- Inspection records (MOT, field books, site source records, quantities, erosion control, deficiencies, daily diary)

Post Construction Activities

- Substantial Completion and Final Acceptance
- Final records
- Claims Resolution, if applicable
- Project certification
- Preparation and submittal of certified final estimate
- Offer of final payment
- Submit signed and sealed as-builts
- Project close-out meeting
- Summarize outstanding issues/provide support to City
- Provide electronic set of all project documentation to City for their archives

Claims Avoidance and Construction Schedule

AECOM understands that late delivery of the project inconveniences the traveling public and the residents, involves increased administration and construction costs to the City, and may adversely affect the City's reputation. Consequently, we believe timely completion and maintenance of the construction schedule to be of the utmost

importance. In the pre-construction phase, a preliminary schedule is the most valuable tool to analyze for potential conflicts, for overestimating/underestimating production, and identifying unrealistic milestones. The most effective way of fending off claims is to recognize the potential for their occurrence early in the project and take the necessary steps to eliminate the issue that may lead to such claim. Special meetings prior to the commencement of major activities on the project are also extremely useful in the avoidance of project issues/conflicts. When circumstances arise in which claims might be justified and unavoidable, AECOM will take steps to resolve the issue in the field to minimize impacts on the contractor's schedule. The goal would be to never let an issue become a claim situation by working towards resolution at the lowest possible level.

Some of the most common causes of claims on a project are not beyond the ability of the CEI to prevent, minimize, or resolve. The AECOM team has the ability to anticipate the type of claim that could be presented, will advise the City of North Port on the probable value of the issue and provide a recommendation on how to proceed. AECOM has the experience to successfully negotiate substantiated items of extra or unforeseen work and can defend the City against unsubstantiated requests.

AECOM has the controls in place to maintain the schedule and budget for this project. The daily observation of construction activities will be compared to the critical items on the contractor's schedule, as well as the two-week look ahead. Any noted slippage of the contractor's schedule will be brought to the attention of the entire team to determine the cause. We will help the contractor in maintaining his schedule and will coordinate the inspection team to meet the demands of the items being constructed, with increases or decreases to staffing levels being adjusted, as necessary.

TAB 6. REFERENCES

Honore Avenue/Pinebrook Road Extension, Phase VII, Sarasota County, FL

This \$11.6M state grant-funded construction project consisted of over 3.5 miles of new two-lane divided roadway between Laurel Road and SR 681. The project included a five-span, 413 LF bridge over Fox Creek utilizing AASHTO Type III beams, over 4,000 LF of 18-inch and 24-inch prestressed concrete pile, over 250,000 pounds of reinforcing steel and just under 1,000 CY of structural concrete. The project also included maintenance of traffic (MOT), erosion control, earthwork with two pond liners, over 16,000 LF of storm drainage, subgrade, base, asphalt, curb and gutter, landscaping, signing, pavement markings and two new signalized intersections at SR 681 and Laurel Road.

AECOM provided full CEI on this contract, including contract administration, field inspection and testing, utility coordination, environmental compliance, and public information.

During construction the County requested additional work be performed, resulting in about \$500,000 in change orders/IFCA's or overruns. The completion date was extended 186 days - 61 days due to weather, 125 due to the request for additional work.

Project Name	HONORE AVENUE/PINEBROOK ROAD EXTENSION, PHASE VII
Project Address	Nokomis, FL
Project Type	CEI Services
Project Cost: CEI	\$1.2M
Project Cost: Construction	\$11.6M
Project Completion Date	5/2016
Contact Name	Robbin Levar, Project Manager
Contact EMail Address	rlevar@scgov.net
Contact Phone Number	941.650.9815
Contact Fax Number	N/A
Client Name	Sarasota County
Client Address	Sarasota County Administration Center, 1660 Ringling Boulevard, 5th Floor, Sarasota, FL 34236

US 17 from DeSoto County Line to CR 634, Hardee County, FL

AECOM provided CEI services on this FDOT District One roadway widening project. The project included roadway reconstruction and expansion from two to four lanes, milling and resurfacing, new bridge construction and bridge widening/rehab, median and linear pond construction with associated drainage, off-site stormwater pond construction, noise abatement walls, box culvert extensions, guardrail, signing and pavement markings, and utility coordination/relocations.

Project Name	US 17 FROM DESOTO COUNTY LINE TO SWEETWATER ROAD (CR 634)
Project Address	Hardee County, FL
Project Type	CEI Services
Project Cost: CEI	\$2.8M
Project Cost: Construction	\$23.5M
Project Completion Date	10/2018
Contact Name	Randall James, PE, Project Manager
Contact EMail Address	randall.james@dot.state.fl.us

Client Name	Florida Department of Transportation-District One Heartland Operations
Client Address	4722 Kenilworth Blvd., Sebring, FL 33870

I-75 at SR 64 Interchange Improvements, Manatee County, FL

The interchange improvements under this \$41M contract consisted of milling and resurfacing, widening, bridge construction, MSE walls, box culvert extension, storm drainage, curb and gutter, sidewalk, guardrail, signalization, ITS, high mast and conventional lighting, signing, pavement markings and utility relocation work. This project received the FTBA Best in Construction (Interchange) Award for 2019.

Project Name	I-75 AT SR 64 INTERCHANGE IMPROVEMENTS
Project Address	Manatee County, FL
Project Type	CEI Services
Project Cost: CEI	\$2.9M
Project Cost: Construction	\$41.0M
Project Completion Date	4/2019
Contact Name	Marléna Gore, Project Manager
Contact EMail Address	marlena.gore@dot.state.fl.us
Contact Phone Number	863.272.5008
Contact Fax Number	N/A

Computer Signal System Update – ATMS Phase 2, Lee County, FL

AECOM provided project administration and CEI services on this \$8.5M federally funded ATMS LAP project. This project consisted of connecting 110 intersections to Lee County's existing Traffic Management System - installation of conduit, fiber optic cable, communication cable, pull boxes, electrical service, controllers, CCTV poles and cameras, ITS cabinets, and other related pedestrian improvements.

Project Name	COMPUTER SIGNAL SYSTEM UPDATE – ATMS PHASE 2 (LAP)
Project Address	Lee County, FL
Project Type	CEI Services
Project Cost: CEI	\$1.8M
Project Cost: Construction	\$8.5M
Project Completion Date	6/2020
Contact Name	Robert Price, PE, Traffic Operations Center Manager
Contact EMail Address	rprice@leegov.com
Contact Phone Number	239.634.4893
Contact Fax Number	N/A
Client Name	Lee County Department of Transportation
Client Address	1500 Monroe Street, Fort Myers, FL 33901

References for Senior Project Engineer, Sandra Boudreau, PE, PMP are provided below:

West Dearborn Street Improvements, Sarasota County, Englewood, FL

This \$7.7M business district improvements along 0.66 miles of roadway, included sidewalk replacements with colored pavers, medallions at roadway intersections made of pavers, addition of pervious pavement parking, landscaping, comfort stations with shade structures, wayfinding signage, lighting and a gateway sign. Operations included implementation of multiple roadway closures while maintaining full business access, including a weekly farmers market and constant coordination with adjacent businesses.

Project Name	WEST DEARBORN STREET IMPROVEMENTS
Project Address	Englewood, FL
Project Type	CEI Services
Project Cost: CEI	\$225,000
Project Cost: Construction	\$7.7M
Project Completion Date	2/2023
Contact Name	Alex Bublik, PE, Project Manager

AECOM Value-Added Features

AECOM believes in providing value added features to their clients whenever possible. We are proposing a local team to the City of North Port – bringing tremendous strengths such as experience, leadership, relationships, strong communication skills, and attention to detail. They have worked together on recent past projects here in the Sarasota County area. We all know what to expect from one another in order to deliver excellence to the City of North Port.

AECOM would like to propose the following additional value-added features for this project:

GoPro. AECOM always provides visual documentation of our projects. We will accomplish this through a periodic collection of panoramic digital photographs at

predetermined stations throughout the project. All surfaces of the project should be documented on a regular basis and we recommend taking 360-degree photographs, every 100-feet, on a monthly basis. In the past, we have typically obtained this data from a subconsultant; however, AECOM has developed an innovative way to obtain this data from our own field staff already working on-site at no additional cost.

We will utilize a GoPro Max 360 Camera as the tool to provide the visual documentation for the project with the camera being affixed on the vehicle roof or carried to obtain the 360-degree views. AECOM will drive or walk through every station of the project with the GoPro Max to obtain 360 views every 100 feet on a monthly basis, at a minimum, with more frequent photographs should the progress of the project warrant it.

Once the monthly photos have been taken, they will be uploaded immediately to the GoPro Cloud Service with access being made available to other users such as the City staff and the contractor. These regularly obtained 360-degree photos of the project will be an important tool to use should disputes or claim issues arise on the project. They are also a great tool when updating stakeholders on the progress of the

job and can be utilized in a variety of ways including PowerPoint presentations, monthly reports or status updates, or just archived for potential later use. It truly gives “a picture is worth a thousand words” a new meaning.

Drones. The utilization of unmanned aerial vehicles (UAVs), commonly referred to as drones, continues to gain interest in more

applications in our everyday lives. AECOM is currently working with FDOT in District Six (Miami) to perform a bottleneck mitigation analysis by capturing a bird’s eye view of traffic patterns during peak travel times at predetermined intersections. This approach gives the engineers a unique perspective of traffic patterns and its direct impact on roadway congestion. There are many other potential uses or applications for UAVs that could be applied on this project, such as providing aerial visualizations of the project’s progress for City Council meetings or for public workshops. One of AECOM’s proposed Senior Inspectors for this project, Ian Anderson, is a FAA certified drone operator. He provides similar drone video footage for his current I-75 project for FDOT.

Scheduling. Because we feel it is that important, AECOM will continue its long-standing practice that all contractor CPM schedule reviews be performed by our in-house scheduling experts. Additional sets of eyes on each submittal will ensure all changes are accounted for, activity sequences and logic are appropriate, cost loading is reasonable, and concerns are properly documented. Our schedulers also support the analysis of, and provide defense against, potential claims that may arise. Keeping the schedule’s integrity intact throughout construction is huge for claims avoidance and is a service AECOM provides that is unique among CEI’s. The AECOM Tampa office houses the largest single in-house estimating and scheduling staff in AECOM worldwide. This group also performs forensic schedule analyses, life cycle cost analysis, resource loading for organizational management, and is involved in BIM and FIM applications to support 3D plans applications.

CONSULTANT/ENGINEER/ARCHITECT

Please select (only) one of the following three options:

Our firm has no actual, potential, or reasonably perceived, **financial*** or **other interest**** in the outcome of the project.

Our firm has a potential or reasonably perceived **financial*** or **other interest**** in the outcome of the project as described here: _____.

Our firm proposes to mitigate the potential or perceived conflict according to the following plan: _____.

Our firm has an actual **financial*** or **other interest**** in the outcome of the project as described here: _____.

***What does "financial interest" mean?**

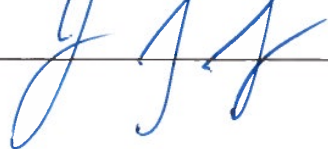

If your firm, or employee of your firm working on the project (or a member of the employee's household), will/may be perceived to receive or lose private income depending on the government business choices based on your firm's findings and recommendations, this must be listed as a financial interest. An example would be ownership in physical assets affected by the government business choices related to this project. The possibility of contracting for further consulting services is not included in this definition and is not prohibited.

****What does "other interest" mean?**

If your firm, or employee of your firm working on the project (or a member of the employee's household), will/may be perceived to have political, legal or any other interests that will affect what goes into your firm's findings and recommendations, or will be/may be perceived to be affected by the government business choices related to this project, this must be listed as another interest.

CONFLICT OF INTEREST FORM

Florida Statutes Section 112.313 places limitations on public officers (including advisory board members) and employees' ability to contract with the City of North Port, Florida ("City") either directly or indirectly.

PART I. *[Select and complete all that apply]:*

I am an employee, public officer, or advisory board member of the City.

Identify the position and/or board: _____

I am the spouse or child of an employee, public officer, or advisory board member of the City.

Identify the name of the spouse or child: _____

I am an employee, public officer or advisory board member of the City, or my spouse or child, is an officer, partner, director, or proprietor of Respondent/Contractor or has a material interest in Contractor. "Material interest" means direct or indirect ownership of more than 5 percent of the total assets or capital stock of any business entity. For the purposes of Florida Statutes Section 112.313, indirect ownership does not include ownership by a spouse or minor child.

Identify the name of the person and the entity _____

Bidder/Contractor employs or contracts with an employee, public officer, or advisory board member of the City.

Identify the name of the employee, public officer, or advisory board member _____

None of the Above

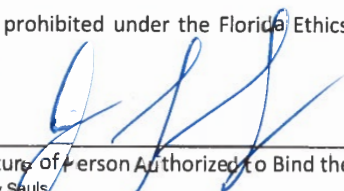

PART II: Will you request an advisory board member waiver?

I WILL request an advisory board member waiver under §112.313(12)

I WILL NOT request an advisory board member waiver under §112.313(12)

N/A

The City will review any relationships which may be prohibited under the Florida Ethics Code and will disqualify any Contractor whose conflicts are not waived or exempt.

CERTIFICATION REGARDING LOBBYING

The undersigned certifies, to the best of his or her knowledge, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31, U.S.C. § 1352 (as amended by the Lobbying Disclosure Act of 1995). Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

The Contractor certifies or affirms the truthfulness and accuracy of each statement of its certification and disclosure, if any. In addition, the Contractor understands and agrees that the provisions of 31 U.S.C. § 3801 et seq., apply to this certification and disclosure, if any.

DRUG FREE WORKPLACE FORM

The undersigned, in accordance with Florida Statutes Section 287.087, hereby certifies that the Contractor, AECOM Technical Services, Inc. (Company Name):

1. Publishes a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.
2. Informs employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.
3. Gives each employee engaged in providing the commodities or Contractual services that are under bid a copy of the statement specified in subsection (1).
4. In the statement specified in subsection (1), notifies employees that, as a condition of working on the commodities or Contractual services that are under bid, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.
5. Imposes a sanction on or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.
6. Makes a good faith effort to continue to maintain a drug free workplace through implementation of this section.

Check one:

- As the person authorized to sign this statement, I certify that this firm complies fully with above requirements.
- As the person authorized to sign this statement, this firm **does not** comply fully with the above requirements.

SCRUTINIZED COMPANY CERTIFICATION FORM

Contractor Name: AECOM Technical Services, Inc.
Authorized Representative Name and Title: J. Larry Sauls, Authorized Signatory
Address: 171 Center Road City: Venice State: FL ZIP: 34285
Phone Number: 239-250-6680 Email Address: larry.sauls@aecom.com

A company is ineligible to, and may not, bid on, submit a proposal for, or enter into or renew a Contract with the City of North Port for goods or services of any amount if, at the time of bidding on, submitting a proposal for, or entering into or renewing such Contract, the company is on the Scrutinized Companies that Boycott Israel List, created pursuant to Florida Statutes, section 215.4725, or is engaged in a boycott of Israel.

A company is ineligible to, and may not, bid on, submit a proposal for, or enter into or renew a Contract with the City of North Port for goods or services of \$1 million or more if, at the time of bidding on, submitting a proposal for, or entering into or renewing such Contract, the company is on the Scrutinized Companies with Activities in Sudan List, the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, created pursuant to Florida Statutes, section 215.473, or with companies engaged in business operations in Cuba or Syria.

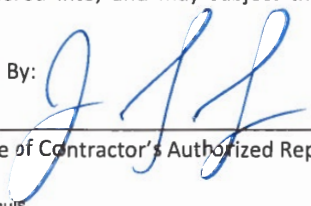

CHOOSE ONE OF THE FOLLOWING

This Contract or Contract renewal is for goods or services of less than \$1 million. As the person authorized to sign on behalf of the above-named company, and as required by Florida Statutes Section 287.135(5), I hereby certify that the above-named company is not participating in a boycott of Israel.

This bid, proposal, Contract or Contract renewal is for goods or services of \$1 million or more. As the person authorized to sign on behalf of the above-named company, and as required by Florida Statutes Section 287.135(5), I hereby certify that the above-named company is not participating in a boycott of Israel, is not on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, and it does not have business operations in Cuba or Syria.

I understand that pursuant to Florida Statutes, section 287.135, the submission of a false certification may result in the termination of the Contract if one is entered into, and may subject the above-named company to civil penalties, attorney's fees and costs.

VENDOR'S CERTIFICATION FOR E-VERIFY SYSTEM

The undersigned Vendor/Consultant/Contractor (Vendor), after being duly sworn, states the following:

1. Vendor is a person or entity that has entered into or is attempting to enter into a contract with the City of North Port (City) to provide labor, supplies, or services to the City in exchange for salary, wages or other remuneration.
2. Vendor has registered with and will use the E-Verify System of the United States Department of Homeland Security to verify the employment eligibility of:
 - a. All persons newly hired by the Vendor to perform employment duties within Florida during the term of the contract; and
 - b. All persons, including sub-contractors, sub-vendors or sub-consultants, assigned by the Vendor to perform work pursuant to the contract with the City.
3. If the Vendor becomes the successful Contractor who enters into a contract with the City, then the Vendor will comply with the requirements of Section 448.095, Fla. Stat. "Employment Eligibility", as amended from time to time.
4. Vendor will obtain an affidavit from all subcontractors attesting that the subcontractor does not employ, contract with, or subcontract with, an unauthorized alien as defined in 8 United States Code, Section 1324A(H)(3).
5. Vendor will maintain the original affidavit of all subcontractors for the duration of the contract.
6. Vendor affirms that failure to comply with the state law requirements can result in the City's termination of the contract and other penalties as provided by law.
7. Vendor understands that pursuant to Florida Statutes, section 448.095, the submission of a false certification may result in the termination of the contract if one is entered into, and may subject the Vendor named in this certification to civil penalties, attorney's fees and costs.

AECOM Technical Services, Inc. – Litigation History (5 Years)

AECOM Technical Services, Inc. (“ATS”) is a large design, engineering, planning and related professional services company that executes thousands of projects annually. As with any large services company, from time to time, ATS is involved in claims and litigation, many of which involve third party personal injury and property damage claims. However, we strive to avoid litigation and have a risk management program in place that includes early recognition of situations that might give rise to a claim, open lines of communication and proactive dispute resolution.

Upon knowledge and belief, formed after reasonable inquiry, ATS has been involved in the disclosed litigation over the past five (5) years related to the performance of professional engineering, design, and construction services in the U.S. None of our current claims could reasonably be expected to have a material adverse effect on ATS or its ability to perform under the contract contemplated by the proposal. If you require additional information, please contact Lusanna Ro, East Region Chief Counsel, DCS Americas, at Lusanna.Ro@aecom.com.

Claimant Name & Case Number	Date Filed & Venue	Status	Claim Description
Frances Katie Williams v. AECOM, et al. Case No. 23-CI00175	March 28, 2023 Henderson County, KY	Pending	Wrongful death action against AECOM and other entities alleging, among other things, AECOM was negligent in the design, engineering, maintenance, and/or construction of a leachate collection system.
April Hill Browning v. AECOM, et al. Case No. CI00173	March 28, 2023 Henderson County, KY	Pending	Wrongful death action against AECOM and other entities alleging, among other things, AECOM was negligent in the design, engineering, maintenance, and/or construction of a leachate collection system.
North Texas Tollway Authority v. Prairie Link Constructors JV, Fluor Enterprises, Inc. and Balfour Beatty Infrastructure, Inc., et al. DC-22-13917	October 7, 2022 District Court for the 160 th Judicial District, Dallas County (TX)	Pending	The owner, the North Texas Tollway Authority brought suit against the design builder, Prairie Link Constructors, JV (PLC), asserting causes of action for breach of contract, negligence, negligent misrepresentation, and attorneys’ fees due to alleged design and construction issues related to certain mechanically stabilized earth retaining walls. PLC subsequently filed suit against AECOM, who served as lead designer, and additional third parties with whom it had contracted to provide services on the project, asserting causes of action for breach of contract, negligence, negligent misrepresentation, duty to defend, indemnity, and contribution. AECOM denies that the retaining walls failed to meet contract specifications and presently is defending itself in the lawsuit.
Coffman Specialties and Hillwood Construction Services v. AECOM Technical Services, Inc. Case No: CIVSB2200818	June 2, 2022 County of San Bernardino	Pending	AECOM recommended the rejection of PCC pavement at the runway apron at the San Bernardino Airport that did not comply with the contract specifications. The contractor Coffman Specialties is disputing that the concrete is acceptable due to defective test specimens.
City of New Haven v. Nosal Builders, Inc., Langan CT, Inc. et al. v. AECOM et al. Case No: HDD-CV-21-6149328-S	May 2, 2022 Superior Court of Hartford CT	Pending	City of New Haven filed a lawsuit against Nosal Builders, Langan and others related to cracking in the planked section of the non-structural topping slab. Langan, the design engineer, has third partied AECOM and others into the suit. AECOM was performing Construction Engineering and Inspection for the City of New Haven.
Kiewit Infrastructure South Co., v. AECOM Technical Services, Inc. Case No. 8:21-cv-02093	August 31, 2021 United States District Court For The Middle District of Florida Tampa Division	Pending	The Complaint asserts two counts for breach of contract and professional negligence. The counts arise out of the following three claims for increased costs Kiewit incurred that we have been trying to resolve with Kiewit and PSI for more than 18 months regarding (1) MSE Wall Ground Improvements; (2) Increased Drilled Shaft Lengths; and (3) Bridge Bearings. Kiewit is seeking \$1.5 MM for additional direct costs due to post award changes in the bridge bearing designs. Kiewit claims that AECOM’s structural engineers failed to consider/recognize certain loads in the pre-award Basis

			of Design. AECOM will file a Counterclaim against Kiewit and file a Crossclaim against PSI.
C.S. Legacy Construction, Inc. v. Mid-Coast Transit Constructors, et al. Case No. 37-2021-00012911-CU-BC-CTL	June 1, 2021 San Diego County Superior Court	Dismissed 11/16/2022	AECOM has been brought into the matter by way of Plaintiff CS Legacy's Complaint and cross-complainant Resource Building Material's cross-complaint alleging, among other related causes of action, professional negligence, negligent representation, and equitable indemnity related to the purchase and installation of warning pavers. AECOM provided as needed construction management support to the project as a subconsultant to Jacobs under their prime agreement with the project owner, SANDAG. Neither Jacobs nor SANDAG have been named in the matter at this time.
AECOM Technical Services, Inc. v. United States ASBCA No. 62800	February 9, 2021 Armed Services Board of Contract Appeals	Pending	AECOM Technical Services, Inc. filed a complaint against the U.S. Army Corps of Engineers with the Armed Services Board of Contract Appeals in connection with a task order for the development and implementation of energy conservation projects at Buckley Air Force Base, Colorado. In its complaint, ATSI asserts that (1) USACE's Engineering and Support Center, Huntsville (CEHNC) acted arbitrarily and capriciously by failing to examine the relevant data and provide a rational explanation for cancelling the Project, (2) CEHNC is required to pay AECOM fair compensation for the value of its goods and services, including termination for convenience costs, and (3) CEHNC breached its duty of good faith and fair dealing.
Flatiron West, Inc. v. City of Oakland v. AECOM Case No. RG19041029	January 29, 2021 County of Alameda, Rene C. Davidson Court House	Pending	The contractor (Flatiron West) has sued the City of Oakland for unpaid fees. The City contends that the unpaid fees were incurred as a result of delays and errors by the Contractor while contemporaneously cross-complaining against the ATS/TY Lin Joint Venture, and ATS and TY Lin individually (collectively the "JV"), that any such delays not caused by the Contractor, are the result of professional negligence on the part of the JV.
Colonial Pipeline Company v. Metropolitan Nashville Airport Authority and AECOM Technical Services, Inc. Case No. 3:20-cv-00666	July 31, 2020 United States District Court for the Middle District of Tennessee Nashville Division	Pending	Cody Mitchell is a seconded employee at the Nashville Airport (MNA) under our Staff Augmentation contract. One of Cody's responsibilities as directed by MNA was to be a resource to TDOT for their work regarding relocation of an adjacent State Route. As a part of the TDOT work, they requested access inside the Airport Operations Area (AOA) for investigative drilling. As TDOT's designated liaison, Cody was asked to schedule a runway closure, and make arrangements for the drilling. According to GIS information provided by the airport, Colonial's pipeline appeared to be 80 feet away. When TDOT began to drill they hit Colonial's pipeline resulting in a spill. Colonial is suing for the clean-up costs.
United States of America v. AECOM, Emergency Response Program Management Consultants, AECOM Technical Services, Inc., AECOM Recovery, and Louisiana Department of Education Case No. 2:16-cv-15092-EEF-KWR	July 28, 2020 Eastern District of Louisiana	Pending	AECOM project specialists are alleged to have inflated estimates in project worksheets prepared for FEMA after Hurricane Katrina, thereby causing FEMA to obligate more funding for disaster victims.
LLS, PLLC d/b/a Manor Kids Dentist v. Shadowglen Development Corporation v. Wurzel Builders, Ltd. Case No. D-1-GN-19-003936	July 17, 2020 District Court, 261 st Judicial District, Travis County, Texas	Pending	Tenant in commercial development alleges negligence in the drainage design as lead to flooding.

Bizzack Construction, LLC v. AECOM Technical Services, Inc. et al. Case No. 5:20-cv-00084-KKC	February 13, 2020 U.S. District Court Eastern District of Kentucky	Pending	Contractor claims additional costs alleged to arise from errors in design of a bridge.
Roebbelen Contracting Inc. v. County of San Luis Obispo Case No. 56-2020-00543728-CU-BC-VTA	January 21, 2020 Ventura County Superior Court	Settled 2021	General contractor is asserting claim for damages relating to increased construction costs and delays against County of San Luis Obispo. County has cross complained against ATS for indemnity and negligence, alleging that at least some of the contractor's alleged damages were caused by design errors and/or omissions.
AECOM Technical Services, Inc. v. Flatiron AECOM LLC Case No. 1:19-CV-02811-WJM-KLM	October 2, 2019 District of Colorado	Pending	Contract and professional negligence dispute.
SJTA v. Sambe v. AECOM et al. Case No. ATL-L-001012-18	September 4, 2019 Superior Court of New Jersey, Atlantic County	Settled 2021	AECOM was the designer of record for the Atlantic City International Airport Aircraft Rescue and Firefighting Station. The building is a two story 40,000 square foot building. SJTA, AECOM's client, has sued Sambe Construction, the construction contractor, and in turn Sambe has sued all contractors and designers on the project. Allegations in the complaint pertain to leak activities and claims related to the HVAC system.
County of San Bernardino v. Skanska USA Civil West, et al. Case No. CIVDS1913509	May 29, 2019 Superior Court of San Bernardino County, California	Pending	Complaint alleging defective and non-conforming work which resulted in construction related issues on a railroad grade separation project in Devore, San Bernardino County.
LM Heavy Civil Construction, LLC v. Port of Palm Beach District Case No. 50217CA005376	May 10, 2019 Palm Beach County, Florida	Settled April 27, 2021	Port received claim from its contractor alleging delays and disruptions due to errors in design. Port denies the contractor's allegations but to the extent it is found liable alleges that AECOM should be liable.
Shop-A-Minit Markets Family Partnership v. 7-11, Inc., Antea Group, AECOM, Enviroprobe Integrated Solutions, Inc. Case No. 19-C-251	March 19, 2019 Circuit Court of Kanawha County, West Virginia	Pending	Plaintiff alleges damages incurred to property during the removal of an underground gas storage tank on the property.
Bilmar Limited Partnership v. 7-11, Inc., Antea Group, AECOM, Kevin Booten, Enviroprobe Integrated Solutions, Inc. Case No. 19-C-249	March 19, 2019 Circuit Court of Kanawha County, West Virginia	Pending	Plaintiff alleges damages incurred to property during the removal of an underground gas storage tank on the property.
JH Kelly, LLC v. AECOM Technical Services, Inc. Case No. 192600	January 29, 2019 Shasta County Superior Court, California	Settled 11/29/2022	Claims for cost overruns and delays arising out of an EPC project to replace compressor station on PG&E's gas transmission line.
Slade Jordan & JWS Restoration v. AECOM Technical Services, Inc. Case No. 19963	October 26, 2018 District Court, Nolan County, Texas	Dismissed July 2019	Multi-plaintiff PBC exposure case related to a remediation project at an abandoned refinery in West Texas owned by Anadarko Petroleum Corporation. Anadarko hired ATS to serve as "Compliance Supervisor" to design, engineer, implement and supervise compliance with safety standards.
AECOM Technical Services, Inc. v. Professional Service Industries, Inc.	November 14, 2018 United States District Court, Middle District	Pending	Damages for breach of contract.

Case No. 8:18-c-v-2981-T-02TGW	of Florida, Tampa Division		
Georgia Environmental Protection Division of the Department of Natural Resources v. AECOM Technical Services, Inc. Case No. 2018CV312204	October 26, 2018 Superior Court of Fulton County, State of Georgia	Dismissed 11/12/2019	Georgia Environmental Protection Division of the Department of Natural Resources (Georgia EPD) filed a breach of contract and professional negligence action against ATS stemming from services provided by ATS in regards to Digital Flood Insurance Rate Maps for the middle Chattahoochee River. Georgia EPD alleged that ATS committed errors and failed to comply with applicable guidance. ATS denied these allegations and moved to dismiss the claims for lack of damages. AECOM's motion to dismiss was granted and the parties resolved outstanding payment claims for which ATS had filed counterclaims against GEPD.
Scott County Public Service Authority v. Vecellio & Grogran, Inc.; AECOM, Inc., et al. Case No. CL 18-545	September 10, 2018 Circuit Court for the County of Scott, Commonwealth of Virginia	Dismissed with Prejudice	The Scott County Public Service Authority has filed suit alleging that the Defendants performing bridge construction and maintenance activities caused damage to the sewer system.
Shop-A-Minit Markets Family Partnership v. 7-11 Inc., Antea Group, AECOM, Kevin Booten, Enviroprobe Integrated Solutions, Inc. Case No. 18-C-1113	August 31, 2018 Circuit Court of Kanawha County, West Virginia	Pending	Plaintiff alleges damages incurred to property during the removal of an underground gas storage tank on the property.
Central Texas Highway Constructors, LLC v. AECOM Technical Services, Inc. Case No. 23881/MK	August 18, 2018 International Court of Arbitration	Pending	Professional negligence and breach of contract dispute arising from design services on a transportation project.

**The above table was comprised from identifiable and retrievable corporate records for AECOM Technical Services, Inc. and excludes (i) claims involving personal injury and property damage claims not otherwise connected with the claims identified, (ii) employment-related matters, and (iii) subsidiaries and affiliates of AECOM Technical Services, Inc.*

Updated: May 2023
