Required inspections for state, local and/or federal operating certifications and/or licenses are based upon total square footage per building, per inspection, as outlined below. Annual inspection fees for commercial buildings with multiple businesses within the same overall building shell (i.e., strip malls, shopping complexes) are calculated on a square footage basis for each individual business therein, as indicated below; however the fee for the overall building shell inspection is instead based on the total number of fire protection systems (i.e., Fire Alarm Control Unites, sprinkler risers, Fire Department Connections, and other associated fire protection systems), at the rate of \$50.00 for the first system plus \$10.00 for each additional system to be inspected.	
First reinspection for noncompliance will not be subject to a fee, each subsequent inspection for noncompliance thereafter shall be subject to a charge two times the original fee amount.
